Most natural disasters are caused by the weather. These include blizzards and hurricanes. Some weather disasters can be predicted by satellite technology, giving people enough time to evacuate and prepare for emergencies. However, natural disasters can strike at any time. Bushfires can be caused by lightning, but some are caused by people. Some kinds of natural disasters like tsunamis are more common in certain areas of the world such as along coastlines. Earthquakes are caused by rock underground breaking which makes the ground shake. They can reduce a home to ruin and rubble.
