Life and the Student Charles Horton Cooley,2015-01-31 Life and the Student 1927 with a new introduction by Jonathan B Imber is a compilation of reflections commentaries and letters from other scholars that Charles Horton Cooley accumulated throughout his life The book includes personal passages on various topics within the realms of reading and writing thinking art science sociology academia religion and human nature There is no formal structure to the book except the literary sense that organizes these thoughts and observations about life It is impossible to categorize these widely ranging commentaries They include discussions of the automobile the impressionable nature of young people the claim that the question of racial superiority is still unresolved his belief that eugenists are inconsistent in their views and more Cooley s work sought to emphasize the connection between society and the individual He believed that the two could only be understood in relationship to each other While researching the effects of social responses and social participation he created the concept of the looking glass self which is the theory that a person s sense of self grows out of interpersonal interactions and the perceptions of others Cooley also showed that social life and the relationship between groups and communities stems from mental phenomena

An Open Book: What and How Young Children Learn From Picture and Story Books Jessica S. Horst,Carmel Houston-Price,2016-01-21 Looking at and listening to picture and story books is a ubiquitous activity frequently enjoyed by many young children and their parents Well before children can read for themselves they are able to learn from books Looking at and listening to books increases children s general knowledge understanding about the world and promotes language acquisition This collection of papers demonstrates the breadth of information pre reading children learn from books and increases our understanding of the social and cognitive mechanisms that support this learning Our hope is that this Research Topic eBook will be useful for researchers as well as educational practitioners and parents who are interested in optimizing children s learning

Drawing for Science Education Phyllis Katz,2017-03-23 This book argues for the essential use of drawing as a tool for science teaching and learning The authors are working in schools universities and continual science learning CSL settings

around the world They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking sometimes direct observation and in other instances their memories The result is a collection of research and essays that offer theory techniques outcomes and models for the reader Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms Secondary students describe their ideas of chemistry and physics Teacher educators use drawings to consider the progress of their undergraduates understanding of science teaching and even their moral ethical responses to teaching about climate change Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted A physician explains how the history of drawing has been a critical tool to medical education and doctor patient communications Each chapter contains samples insights and where applicable analysis techniques The chapters in this book should be helpful to researchers and teachers alike across the teaching and learning continuum The sections are divided by the kinds of activities for which drawing has historically been used in science education An instance of observation Audubon Linnaeus A process how plants grow over time what happens when chemicals combine Conceptions of what science is and who does it Images of identity development in science teaching and learning

between humans and their environment that it will be equally applicable to natural and designed environments and that it doesn't regard dichotomies like city contra nature or social contra ecological. Hence this Research Topic is interested in if the transactional approach can be used as a conceptual tool not only for promotion of mental physical and social health in cities but simultaneously for unraveling relations at the micro scale in cities which can be used for solutions that also promote a healthy Biosphere.
