- **Piaget:** Swiss psychology who created theory of cognitive development to explain the processes by which humans come to perceive, organize knowledge, solve problems and understand the world. According to this theory, human cognitive development is the product of a consistent, reliable pattern or plan of interaction with the environment, known as a scheme. Schemes are goal-oriented strategies that help the person achieve some intended result. These schemes are sensorimotor (occurring in infancy and early which, in which reflexes and motor responses are prevalent) and cognitive (based on experience and on mental images, reflecting the person's ability to develop the use of abstract reasoning and symbolism).
- **Erikson:** German psychologist who worked in human psychosocial development theory. Created 8 stages of life.
- **Karen Horney:** Disputed penis envy, calling it both inaccurate and demeaning to women. Instead, Horney proposed that men experience feelings of inferiority because they cannot give birth to children.
- **Masters & Johnson:** Created sensate focus exercises, which focuses on progressive exercises, begins with non-genital touching only, leads to genital touching. Goal is to receive pleasure without pressure to perform and/or achieve orgasm.
- **Jesse Taft and Virginia Robinson:** Started functional theory. They attributed to the School of SW in PA and influenced the work of Mead, Dewey & Rank. This model was presented in contrast to the diagnostic school of thought (which was primarily psychoanalytic).
- **Anna Freud:** Started ego psychology
- **Fritz Perls:** Founder of Gestalt theory
- **Mahler:** Founder of object-relations theory
- **Carl Rogers:** Founder of client – centered theory
- **Pincus & Minahan & Garvin:** Founders of systems theory
- **Ackerman:** "Father of family therapy." He primarily used a psychoanalytic approach, insight oriented
- **Satir & Whitaker:** Communications in family therapy. Mainly experiential (through experience), communication and humanistic, awareness of here and now leading to personal accountability, and increasing patterns of interaction. Satir focused on communication problems, double bind, faulty communication is caused by low self-esteem, and she was more of a practitioner than a theoretician. Whitaker mostly operated with unconscious and discussed the transference phenomena. Generally communication family therapist acknowledges that intrapsychic factors can provide a foundation for family problems, but they do not try to interpret these factors. Family therapist who founded the emphasis in communication patterns are often referred to as the "Palo Alto" group
