Is Gwyneth Paltrow Wrong About Everything? Timothy Caulfield, 2016-05-10 An exploration of the effect our celebrity dominated culture has on our ideas of what it means to live the good life What would happen if an average Joe tried out for American Idol underwent a professional makeover endured Gwyneth Paltrow s Clean Cleanse and followed the outrageous rituals of the rich and famous Health law policy researcher Timothy Caulfield finds out in this thoroughly unique engaging and provocative book about celebrity culture and its iron grip on today s society Over the past decade our perceptions of beauty health success and happiness have become increasingly framed by a popular culture steeped in celebrity influence and ever more disconnected from reality Research tells us that our health decisions and goals are influenced by celebrity culture and endorsements our children s ambitions are now overwhelmingly governed by the fantasy of fame and the ideals of beauty and success are mediated through a celebrity dominated worldview But while much has been written about the cause of our obsession with the rich and famous Caulfield argues that not enough has been done to debunk celebrity messages and promises about health diet beauty or happiness From super thin models to Gwyneth Paltrow s endorsement of a gluten free diet for almost anyone celebrity opinions have the power to dominate our conversations and outlooks In this book Caulfield provides an entertaining look into the celebrity world including vivid accounts of his own experiences trying out for American Idol having his skin resurfaced and doing the cleanse interviews with actual celebrities thought provoking facts and a practical and evidence based reality check on our own celebrity ambitions

Arguing Counterterrorism Daniela Pisoiu, 2014-04-03 This book offers a multifaceted analytical account of counterterrorism argumentative speech Traditionally existing scholarship in this field of research has taken a selective focus on issues and actors concentrating mainly on US state discourse after 9 11 However this approach ignores the fact that there was counterterrorism speech before 9 11 and that there are other countries and other actors who also actively engage in the counterterrorism discursive field both within and outside of the Western world Addressing several thematic

chronological and methodological gaps in the current literature Arguing Counterterrorism offers a dynamic perspective on counterterrorism argumentative speech Over the course of the volume the authors tackle the following key issues first historical and cultural continuity and change Second the phenomenology of counterterrorism speech its nature instrumentalisation implications and interactions between the various actors involved The third theme is the anatomy of counterterrorism speech namely its political cultural and linguistic constitutive elements Employing a multi disciplinary framework the authors explore these issues through a geographically and historically diverse range of case studies resulting in a book that broadens the perspective of counterterrorism argumentation analysis This book will be of much interest to students of critical terrorism studies counterterrorism discourse analysis security studies and IR *Broadcasting Change* Joseph Braude,2017-11-30 Amid civil war failing states and terrorism Arab liberals are growing in numbers and influence Advocating a culture of equity tolerance good governance and the rule of law they work through some of the region s largest media outlets to spread their ideals within the culture Broadcasting Change analyzes this trend by portraying the intersection of media and politics in two Arab countries with seismic impact on the region and beyond In Saudi Arabia where hardline clerics silenced their opponents for generations liberals now dominate the airwaves Their success in weakening clerics grip over the public space would not only help develop the country it would ensure that the birthplace of the prophet Muhammad exports a constructive understanding of Islam In Egypt home to a brutal government crackdown on Islamists and a bloodsport of attacks on Coptic Christians local liberals are acting with courage on the ground and over the airwaves Through TV talk shows drama and comedy they play off the government s anti Islamist agenda to more thoughtfully advocate religious reform Author Joseph Braude himself a voice in Arabic language broadcasts and publications calls for international assistance to the region s liberals particularly in the realm of media Local civic actors and some reform minded autocrats welcome a new partnership with media experts and democratic governments in North America Europe and the Far East Broadcasting Change argues that support for liberal reform through Arabic media should be construed as an international public good on par with military peacekeeping and philanthropy **Colour and Light in the Ocean** Victor Martinez-Vicente,Astrid Bracher,Didier Ramon,Shubha Sathyendranath,Tiit Kutser,2020-03-26 CLEO publications in Frontiers in Marine Science Foreword Josef Aschbacher Director of ESA s Earth Observation Programmes Satellite data have drastically changed the view we have of the oceans Covering about 70% of Earth s surface oceans play a unique role for our planet and for our life but large areas remain unexplored and are difficult to reach Since the 1980s Earth orbiting satellites have helped to observe what is happening at the ocean surface Sensors like CZCS AVHRR SeaWiifs and MODIS provided the first ocean colour data from space Starting in 2002 ESA s Medium Resolution Imaging Spectrometer MERIS on board the environmental satellite Envisat provided detailed information on phytoplankton biomass and concentrations of other matter in the global oceans These satellite observations laid the groundwork for studying the marine environment and how it

responds to climate change and the research community has since delivered information on the variability of marine ecosystems Part of this work is reflected in this stunning collection of peer reviewed publications presented at the workshop Colour and Light in the Ocean from Earth Observation CLEO held at ESA s ESRIN site in Frascati Italy on 6 8 September 2016 The event attracted more than 160 participants from all over the world including remote sensing experts marine ecosystem modelers in situ observers and users of Earth observation data Scientifically the meeting covered applications in climate studies over primary productivity and ocean dynamics to pools of carbon and phytoplankton diversity at global and regional scales It also demonstrated the potential of Earth observation and its contribution to modern oceanography Looking to the future new satellites developed by ESA under the coordination of the European Commission will further our scientific and operational observations of the seas With Sentinel 3A in orbit and its twin Sentinel 3B following in 2017 there is a new category of data available for operational oceanographic applications and climate studies for years to come These data are free and easy to access by anyone interested Looking at the role of oceans in our daily lives I am sure that this collection of scientific excellence will be valued by scientists of today and will inspire the next generation to carry these ideas into the future
