Stearns,2020-10-13 The Routledge History of Death Since 1800 looks at how death has been treated and dealt with in modern history the history of the past 250 years in a global context through a mix of definite often quantifiable changes and a complex qualitative assessment of the subject The book is divided into three parts with the first considering major trends in death history and identifying widespread patterns of change and continuity in the material and cultural features of death since 1800 The second part turns to specifically regional experiences and the third offers more specialized chapters on key topics in the modern history of death Historical findings and debates feed directly into a current and prospective assessment of death as many societies transition into patterns of ageing that will further alter the death experience and challenge modern reactions Thus a final chapter probes this topic by way of introducing the links between historical experience and current trajectories ensuring that the book gives the reader a framework for assessing the ongoing process as well as an understanding of the past Global in focus and linking death to a variety of major developments in modern global history the volume is ideal for all those interested in the multifaceted history of how death is dealt with in different societies over time and who want access to the rich and growing historiography on the subject Chapter 1 of this book is freely available as a downloadable Open Access PDF at http www taylorfrancis com under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license Verhandlungen des Deutschen Bundestages Germany (West).
