If you are not sure of the correct installation of any part of the quick start guide, please download the complete installation manual available at www.autopageusa.com. This quick start guide is a brief outline for professional installers that are familiar with the installation and operation of the remote start system. Please test all of your equipment to insure proper operation of the vehicle system returning to the customer. For additional technical support, please call 800-888-8888 and visit for the first available technician. Technical support hours are Monday through Saturday from 8:00 to 5:00 Pacific Standard Time.

This Remote Starter with Keyless Entry System has been designed to be installed on transportation vehicles with an automatic transmission (AT).

1. Read manual for vehicle owner or a vehicle technician.

2. This system must be installed and tested through a safety switch so it will not start in any forward or reverse gear.

Some automatic transmission vehicles having other shift vehicles with a parking brake may have a mechanical-type park safety switch instead of electrical safety switch. The mechanical type does not interrupt the starter circuit when the transmission is in any gear and does not allow the 100% level of safety required for remote starting operation. Therefore, our system should never be installed on any vehicle that uses a mechanical-type park safety switch.

Once you install this system, you must verify that the vehicle will not start in any forward or reverse gear regardless of the type of vehicle.

Read the operation manual for operating.

Do not park any component near the brake, gas pedal or shifting lever.

Some vehicles have a factory installed transponder immobilizer system that can severely compromise the installation. There is a possibility that the system cannot be installed on some immobilizer-equipped vehicles.

Many vehicles have an ABS or air system. Our vehicle code will do not panic any sort of the ABS system.

Disconnect the air battery before beginning work on the vehicle.

Check battery grounds before wiring any lines. Ensure that no wiring terminals or other components are located between the points that would otherwise be damaged.

Do not use conventional jump box, battery or any wiring that wiring, i.e. repair parts will possibly obstruct connectivity into the alarm system and may result in false alarm or increased operation. The suggested installing of connection points.

Install the wiring neatly under carpets or under wire to prevent possible damage to wires.
