Elementary Surveying Paul R. Wolf, Russell Charles Brinker, 1989 New edition of the classic surveying textbook The seventh edition of 1984 is cited in BCL3 Annotation copyright by Book News Inc Portland OR **Surveying** Francis H. Moffitt, John D. Bossler, 1998 The practice of modern surveying is undergoing rapid change due to the availability of electronically controlled instruments the widespread adoption of the Global Positioning System GPS and the proliferation of various geographic Land Information Systems GIS LIS Nevertheless the principles underlying these new technologies remain constant In the tenth edition of this benchmark text Frank Moffitt and John Bossler strike the appropriate balance between teaching students the fundamental principles of surveying and bringing them up to date on the technological advances that are changing the field The tenth edition of this classic work completely modernizes much of the notation form and substance of the original By removing much of the dated information the authors have been able to add entire new chapters on GPS and GIS Throughout the text emphasis is placed on NAD 83 over NAD 27 as the new datum is being utilized more frequently Readers familiar with previous editions of this textbook will still recognize its clear yet rigorous explanation of topics No shortcuts are taken in the presentation of material from the time a concept is introduced through its exploration in worked examples The book s tradition of covering both plane and geodetic surveying has been preserved which makes it the most
