Middle Powers And The Rise Of China:

Middle Powers and the Rise of China Bruce Gilley, Andrew O'Neil, 2014-07-08 This is the first work to examine the importance and role of middle powers in the key phenomenon of contemporary international politics the rise of China This book reviews China's middle power relations with South Korea Malaysia Thailand Indonesia Australia South Africa Turkey and Brazil

Shifting Power in Asia-Pacific? Enrico Fels, 2016-11-03 This book investigates whether a power shift has taken place in the Asia Pacific region since the end of the Cold War By systematically examining the development of power dynamics in Asia Pacific it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour With a special emphasis on Sino US competition the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities national power and the much cited regional power shift The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power CIAP that includes 55 variables for 44 regional countries and covers a period of twenty years Moreover it develops a middle power theory that outlines the significance of middle powers in times of major power shifts By addressing political military and economic cooperation via a structured focused comparison and by applying a comparative historical analysis the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing

Rethinking Middle Powers in the Asian Century Tanguy Struye de Swielande, Dorothee Vandamme, David Walton, Thomas Wilkins, 2018-09-27 The term middle power is conceptually fragile Some scholars have even argued for abandoning it This book argues that the concept needs to be analysed more profoundly and that new analytical tools need to be developed to better understand the phenomenon The traditional approach based on Western states is insufficient and has become increasingly irrelevant in a transformed global environment Instead of drawing from a single theory of international relations the contributors have chosen to build upon a wide range of theories in a deliberate demonstration of analytic eclecticism A pluralistic approach provides stronger explanations while remaining analytically and intellectually rigorous Many of the theory contributions are reconsidering how the largely Western bases of such theorising need revising in light of the emerging middle powers many of which are in Asia Presenting a strong argument for studying middle powers this book explores both the theory and empirical applications of the concept by rethinking the definition and characteristics of middle powers using a range of case studies It examines changes in the study of middle powers over the last decade proposing to look at the concept of middle powers in a coherent and inclusive manner Finally it aims to further the discussion on the evolution of the international system and provides sound conclusions about the theoretical usefulness and empirical evolution of middle powers today

Great Power Relations, World Order, and the Third World Sisir Gupta, Jawaharlal Nehru University. School of International Studies, 1981 Commemoration volume for Sisir Gupta former professor in diplomatic school Jawaharlal Nehru University comprises contributed articles

Middle Powers in International Politics Carsten

Holbraad,1984 *East Asian Security* ,2006 **Canada's Role as a Middle Power** J. King Gordon,1966 The Journal of Japanese Studies ,2007 A multidisciplinary forum for communicating new information new interpretations and recent research results concerning Japan to the English reading world Non-Western Middle Powers in the Multipolar Order Hanna Samir Kassab,Natalie Ann Ghosn,2025-08-05 Non Western Middle Powers in the Multipolar Order explores the changing international order articulating the critical and growing importance of non Western states to the emerging global order It brings together international scholars to provide new insights on the evolution of international order as global politics moves from an American Western dominated one to one where major players are from the Global South They present evidence from Brazil Turkey Saudi Arabia the UAE and India which help explain analyze and understand the main political security and economic challenges in these countries Questions asked include What factors explain the rise of new non Western middle powers How would theories of international relations specifically realism liberalism and Marxism change due to their rise How would the rise of these non Western middle powers shape the emerging multipolar order An invaluable collection for scholars and students of International Relations and International Security that will also be of great interest to scholars with a broader interest in the ever evolving world order *The Role of Middle Powers in the Pacific* Centre for Strategic and International Studies,Asia Pacific Foundation of Canada,1985 **The Journal of East Asian Affairs** ,2007

Gateway to the Pacific Rim Association of Research Libraries. Meeting,1993 *China's Rise* Robert G. Sutter,2006 Executive Summary Foreign policy makers in the United States should not be misled by prevailing media and scholarly assessments that exaggerate China s influence in Asia relative to that of the United States In particular it would be a mistake for the Bush administration to give in to recent congressional media and interest group pressures that employ overstated assessments of China s increasing power in order to push for tough U S government policies to confront and compete with China This study shows that overt U S competition with China for influence is unwelcome in Asia counterproductive for U S interests in the region and unwarranted given the limited challenge posed by China s rise Prevailing assessments and commentaries about China s rise in Asia are unbalanced emphasizing China s strengths and the United States weaknesses With few exceptions they give inadequate attention to Chinese weaknesses and U S strengths This study demonstrates that China s recent success in Asia rests heavily on a fairly narrow foundation that is generally adroit Chinese diplomacy and intra Asian trade that is less significant than the reported figures of annual trade between China and its neighbors would suggest China s willingness and ability to lead in Asia is undermined notably by many domestic preoccupations nationalistic ambitions at odds with Asian neighbors and economic complications posed by China s rise as many countries in Asia are left further behind Moreover Chinese leaders and officials continue to follow policies that do not require either China or its neighboring countries to make significant changes sacrifices or commitments for one another that they would not ordinarily make Thus China s Asian approach focuses on easy things the low hanging fruit and avoids costly commitments or major risk

By contrast U S leadership in Asia though challenged by unpopular policies in Southwest Asia and Korea along with insufficient attention in dealing with Asian governments remains strong in undertaking responsibilities and providing needed security and economic benefits to Asian states The United States continues to show influence in Asia in concrete ways notably by influencing Asian governments to do things they would not be inclined to do Predictions of an emerging order in Asia led by a rising China that will marginalize the United States illustrate how far many of the predominate unbalanced media and scholarly assessments have gone They reflect a poor understanding of the ambitions of Asian governments the resilience of U S power and leadership and the actual status of China s influence relative to that of the United States in Asian states around China s periphery To some extent a rising China that generally accommodates its neighbors benefits from the fluid post Cold War Asian order as various Asian governments seek to broaden international options with various powers in a continuing round of hedging and maneuvering for advantage But as China rises in influence in Asia this study shows that these same neighboring governments hedge and maneuver against possible Chinese dominance In this process they quietly seek closer ties with one another and particularly with the region s dominant power the United States America s advantages in this situation are strong The United States has a proven record of being able and willing to commit significant resources and prestige to protect allies and friends The United States is very powerful a superpower but it is far away from Asia and has none of the territorial and few of the other ambitions that characterize Asian powers Thus it is less distrusted by Asian governments in comparison with how these governments view one another including China As a result most Asian governments including China and all the major powers in Asia give higher priority to relations with the United States than to relations with any power in Asia In addition to being Asia s economic partner of choice and acknowledged security guarantor the United States has a leadership position in Asia that rests on a determined U S administration prepared to confront adversaries and opponents This position gives pause to Asian governments seeking to challenge or displace the United States The analysis in this monograph demonstrates that even hard line Chinese critics of U S hegemony in Asian and world affairs have been compelled in recent years to adopt a low posture in dealings with the United States choosing to wait as China builds comprehensive national power over the coming decades Chinese leaders are often frustrated by U S policies and power and desirous over the long term to see their periphery free of constricting U S great power involvement However they show little sign of deviating from efforts to expand influence in selected ways that tend to avoid directly challenging the United States Thus for the most part China s rise in Asia does not come at the expense of U S interests and is not a part of a zerosum game resulting in the automatic decline of U S influence To enhance its position in Asia Washington should focus on repairing negative features of recent U S policy in Asia related to the fallout of its actions in Iraq the Middle East and Korea U S unilateralism in international politics and inattentiveness to the concerns of Asian governments over economic development nation building and multilateral cooperation This recommendation requires adjustments not a wholesale

revamping of U S policies Backed by continued careful management of U S security commitments and economic relations with regional governments they will enhance the leading role of the United States in Asian affairs The prevailing tendency of Asian governments to hedge in the post Cold War environment seems likely to continue to pose challenges for U S management of alliance and other relations with Asian governments seeking more independence and freedom of action inclining some to seek closer ties with China among others Policymakers in the United States should not overreact to such maneuvers recognizing that such hedging continues to provide a prominent role for the United States as the region s well recognized security stabilizer and economic partner of choice In particular Chinese government leaders found that their overt efforts in the late 1990s to compel Asian governments to choose between a rising China and the United States failed in the face of Asian governments long unwillingness to do so The government should learn from this experience in seeking to advance its leadership in Asia without the overt competition with China that would try to force Asian governments to make such a choice probably with negative implications for U S leadership in Asia

Minutes of the Meeting - Association of Research Libraries Association of Research Libraries, Association of Research Libraries. Meeting, 1993 Vol 52 includes the proceedings of the conference on the Farmington Plan 1959

The Rise of China Jun Tsunekawa, 2009

The Rise of a Multipolar World Werner Kaltefleiter, Ulrike Schumacher, 1998

China's Footprints in Southeast Asia Ma. Serena I. Diokno, Xinhuan Xia, Alan Hao Yang, 2019 The countries that make up Southeast Asia are seeing an incredible resurgence in their economic power Over the past fifty years their combined wealth has reached the same level as the United Kingdom and taken together they are on track to become the fifth largest world economy But that stability and success has drawn the attention of the second largest world economy China The emerging superpower is increasingly involved in Southeast Asia as part of the ongoing global realignment As China deepens its influence across the region the countries of Southeast Asia are negotiating spaces for themselves in order to respond to or even challenge China s power This is the first book to survey China s growing role in Southeast Asia along multiple dimensions It looks closely and skeptically at the multitude of ways that China has built connections in the region including through trade foreign aid and cultural diplomacy It incorporates examples such as the operation of Confucius Institutes in Indonesia or the promotion of the concept of guangxi China s Footprints in Southeast Asia raises the question of whether the Chinese efforts are helpful or disruptive and explores who it is that really stands to benefit from these relationships The answers differ from country to country but as this volume suggests the footprint of hard and soft power always leaves a lasting mark on other countries institutions
