The Resettlement of Sex Offenders after Custody David Thompson, Terry Thomas, 2017-07-14 Sexual offending is a very contemporary issue and not least following news of historical cases of well known people and of localised grooming for sexual exploitation e g the Rotherham case The rehabilitation of all offenders from prison is currently

undergoing a transformation initiated by the coalition government The position of the voluntary sector in that transformation see 2 alongside the public probation service and private sector is still being discussed Voluntary work has taken on a new significance in the age of austerity and the so called Big Society even though that term has recently fallen into some disuse Circles of Support and Accountability challenge the prevailing negative public protection agenda which just seeks to constrain offenders and offers a more positive way of working with sex offenders Rewilding in Practice Ian Convery, Steve Carver, Monica T. Engel, Sally Hawkins, Rene Beyers, Yue Cao, 2025-03-03 Rewilding is a long term and large scale process which works to restore degraded ecosystems or social ecological systems to the point that they are resilient and self sustaining and therefore requiring little in terms of conservation management Rewilding practice focuses on re establishing ecological processes including trophic levels that were lost mainly due to anthropogenic disturbance It also aims to affect a paradigm shift in human nature relationships with intentions to better understand the interdependencies between humans and nature so that people can appreciate and accommodate nature in their landscapes and make more informed and sustainable decisions about how we live In this sense rewilding has real transformational potential **A Political Ecology of Women, Water and Global Environmental Change** Stephanie Buechler, Anne-Marie Hanson, 2015-03-02 This edited volume explores how a feminist political ecology framework can bring fresh insights to the study of rural and urban livelihoods dependent on vulnerable rivers lakes watersheds wetlands and coastal environments Bringing together political ecologists and feminist scholars from multiple disciplines the book develops solution oriented advances to theory policy and planning to tackle the complexity of these global environmental changes Using applied research on the contemporary management of groundwater springs rivers lakes watersheds and coastal wetlands in Central and South Asia Northern Central and Southern Africa and South and North America the authors draw on a variety of methodological perspectives and new theoretical approaches to demonstrate the importance of considering multiple layers of social difference as produced by and central to the effective governance and local management of water resources This unique collection employs a unifying feminist political ecology framework that emphasizes the ways that gender interacts with other social and geographical locations of water resource users In doing so the book further questions the normative gender discourses that underlie policies and practices surrounding rural and urban water management and climate change water pollution large scale development and dams water for crop and livestock production and processing resource knowledge and expertise and critical livelihood studies This book will be of interest to students and scholars of environmental studies development studies feminist and environmental geography anthropology sociology environmental philosophy public policy planning media studies Latin American and other area studies as well as women s and gender studies **The Adaptation and Response of Aquatic Animals in the Context of Global Climate Change** Hongsheng Yang , John I. Spicer, Juan D. Gaitan-Espitia, 2023-07-24 Anthropogenic climate change has driven widespread changes in marine environments including

ocean warming ocean acidification and the formation of hypoxic zones Such environmental changes would pose direct challenges to the survival and adaptation of aquatic organisms greatly affecting the biodiversity of marine life and marine ecosystems Changes in the marine environment are likely to have strong effects at the physiological behavioral and molecular levels with implications at the individual population and species levels resulting in the degradation of genetic resources through massive mortality For example the ingestion digestion respiration and growth of aquatic animals were greatly depressed under extreme environments In the long run maintaining a sustainable ocean would require a better understanding of the adaptation of marine animals in response to the effects of multiple environmental stressors The Research Topic is aimed to discuss the potential impacts of individual and compounded extreme environments on aquatic animals as well as the regulatory mechanisms and adaptation strategies of marine species to cope with these impacts

Drawing Down N2O to Protect Climate and the Ozone Layer ,2013 This report addresses the benefits of drawing

down nitrous oxide N₂O emissions N₂O is now the most significant ozone depleting substance emission and the third most important greenhouse gas released into the atmosphere Global anthropogenic N₂O emissions are rapidly increasing and are expected to almost double by 2050 unless mitigation action is accelerated The continued build up of N₂O in the atmosphere will continue to deplete the stratospheric ozone layer and in so doing will to a degree undermine the achievements of the Montreal Protocol The build up of N₂O will also make it more difficult to achieve climate targets Two thirds of current anthropogenic N₂O emissions originate from agriculture and these can be reduced by boosting nitrogen use efficiency especially by making the use of fertilizer manure and feed more efficient Improving nitrogen use efficiency can be accomplished through a wide variety of feasible options *The United Nations World Water Development Report World Water Assessment Programme (United Nations), 2017* **Ghana's Second National Communication to the UNFCCC, 2011**, 2011 **Journal of Soil and Water Conservation**, 2014 Vol 25 no 1 contains the society's Lincoln Chapter's Resource conservation glossary *Handbook of Applied Hydrology, Second Edition* Vijay P.
