McLeans University Guide:

Maclean's Guide to Bombay James Mackenzie Maclean, 1875 University Rankings, Diversity, and the New Landscape of Higher Education, 2019-02-18 University rankings are a relatively new phenomenon in higher education. Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear. Rankings attempting to measure university performance beyond national borders. No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world. This book is written as part of the effort to better understand rankings and their effects on higher education. A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed. If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology. A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education. Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built. Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector. *The Routledge International Handbook of Higher Education* Malcolm Tight, Ka Ho Mok, Jeroen Huisman, Christopher Morphew, 2009-06-03 This volume is a detailed and up to date reference work providing an authoritative overview of the main issues in higher education around the world today. Consisting of newly commissioned chapters and impressive journal articles it surveys the state of the discipline and includes the examination and discussion of emerging controversial and cutting edge areas. *Medicine for Life: A Practical Guide for Success* Jacques G LeBlanc M.D., F.R.C.S.C., 2015 Deciding on a career path is difficult for many people. Deciding of the best university of an interesting and challenging subspecialty of where to get established are just a few of the vast challenges you will face in preparing for a successful medical career. Whether you are a medical student a resident a family practitioner or a specialist this book is an essential guide for many if not every facet of your medical career. It is a valuable resource because it covers a wide variety of topics such as choosing a medical school a residency training program a type of practice establishing your practice surrounding yourself with experts accountants financial advisors banker and others understanding the realities challenges and up coming changes in medical practice preparing for retirement and retiring. Browse to the book as often as you want to refresh your memory to look at a specific subject. The Curiosity of School Zander Sherman, 2012-08-07 It is one thing we all have in common. We've all been to school. But as Zander Sherman shows in this fascinating often shocking account of institutionalized education sending your kids off to school was not always normal. In fact school is a very recent invention. Taking the reader back to 19th century Prussia where generals worried about soldiers troubling individuality.

sought a way to standardize every young man of military age through to the most controversial debates that swirl around the world about the topic of education today Sherman tells the often astonishing stories of the men and women and corporations that have defined what we have come to think of as both the privilege and the responsibility of being educated Along the way we discover that the SAT was invented as an intelligence test designed to allow the state to sterilize imbeciles that suicide in the wake of disappointing results in the state university placement exams is the fifth leading cause of death in China and that commercialized higher education seduces students into debt as cynically as credit card companies do Provocative entertaining and even educational The Curiosity of School lays bare the forces that shape the institution that shapes all of us
