

## SETTING THE TIME

- Before inserting the batteries, adjust the time to **12:00 PM** using the Time Setting knob to rotate the hands **CLOCKWISE**.
- Insert two "C" size alkaline batteries according to the "+" symbols in the battery holders.
- Set the time by using the Time Setting knob to rotate the hands **CLOCKWISE**. If setting the time for PM, make sure the hour hand passes through 12 o'clock noon until the desired time is shown. While setting the time, it is normal to hear sounds from the movement as gears turn. Continue advancing the time until the correct time is shown. Once the time is set, the melody will adjust to the time selected, however it is important that the clock movement be allowed to operate for at least one hour for the chime sequence to become fully functional. The clock may show out of sequence during the first hour of operation. The quartz movement is highly accurate and has been adjusted at the factory for precise time keeping.
