Parinov, Vitaly Yu. Topolov, 2014-03-25 Advanced materials are the basis of modern science and technology This proceedings volume presents a broad spectrum of studies of novel materials covering their processing techniques physics mechanics and applications The book is concentrated on nanostructures ferroelectric crystals materials and composites materials for solar cells and also polymeric composites Nanotechnology approaches modern piezoelectric techniques and also latest achievements in materials science condensed matter physics mechanics of deformable solids and numerical methods are presented Great attention is devoted to novel devices with high accuracy longevity and extended possibilities to work in wide temperature and pressure ranges aggressive media etc The characteristics of materials and composites with improved properties opening new possibilities of various physical processes in particular transmission and receipt of signals under water are described      **The Aeronautical Journal** , 2004      Materials Science on CD-ROM Andrew J. Green, Boban Tanovic, Ian Jones, Ann Fretwell, Peter J. Goodhew, 1998-01-22 Materials Science on CD ROM has been designed by the MATTER team for teachers and students of materials science metallurgy engineering and other related disciplines This collection of completely interactive learning modules created to make use of those functions best performed by computer makes it easier to understand the complex concepts of this challenging discipline Designed to complement traditional teaching and learning methods this CD ROM fits well with the current selection of textbooks available and serves as a stimulating resource for teachers explaining new concepts Materials Science on CD ROM guides students through the key concepts at their own pace The hands on approach to learning can accelerate the understanding of materials science and prove extremely useful in reviewing for exams Its highly interactive facilities allow students to test their own understanding for example they can see how graphs and processes change by selecting different parameters They can also test their knowledge by answering the questions that appear within each module Graphical animation and hypertext links between related screens and topics

further enhance these features      **Bio-Inspired Materials** Ulisses Targino Bezerra, Heber Sivini Ferreira, Normando Perazzo Barbosa, 2019-04-16 Nature has provided opportunities for scientists to observe patterns in biomaterials which can be imitated when designing construction materials. Materials designed with natural elements can be robust and environment friendly at the same time. Advances in our understanding of biology and materials science coupled with the extensive observation of nature have stimulated the search for better accommodation, compression of materials and the higher organization, reduction of mechanical stress in man-made structures. Bio-Inspired Materials is a collection of topics that explore frontiers in 3 sections of bio-inspired design: i) bionics design, ii) bio-inspired construction, and iii) bio materials. Chapters in each section address the most recent advances in our knowledge about the desired and expected relationship between humans and nature and its use in bio-inspired buildings. Readers will also be introduced to new concepts relevant to bionics, biomimicry, and biomimetics. Section i presents research concepts based on information gained from the direct observation of nature and its applications for human living. Section ii is devoted to artificial construction of the Earth. This section addresses issues on geopolymers, materials that resemble the structure of soils and natural rocks, procedures that reduce damage caused by earthquakes in natural construction, the development of products from vegetable resins, and construction principles using bamboo. The last section takes a look into the future towards the improvement of human living conditions. Bio-Inspired Materials offers readers having a background in architecture, civil engineering, and systems biology a new perspective about sustainable building, which is a key part of addressing the environmental concerns of current times.      **The British Library General Catalogue of Printed Books, 1986 to 1987** British Library, 1988      **Scientific and Technical Books and Serials in Print**, 1984      *Scientific and Technical Books in Print*, 1972      **Subject Guide to Books in Print**, 1993
