Wong, Editors, 2011      Production Chemicals for the Oil and Gas Industry, Second Edition Malcolm A. Kelland, 2014-03-13 Production chemistry issues result from changes in well stream fluids both liquid and gaseous during processing Since crude oil production is characterized by variable production rates and unpredictable changes to the nature of the produced fluids it is essential for production chemists to have a range of chemical additives available for rectifying issues that would not otherwise be fully resolved Modern production methods the need to upgrade crude oils of variable quality and environmental constraints demand chemical solutions Thus oilfield production chemicals are necessary to overcome or minimize the effects of the production chemistry problems Production Chemicals for the Oil and Gas Industry Second Edition discusses a wide variety of production chemicals used by the oil and gas industry for down hole and topside applications both onshore and offshore Incorporating the large amount of research and applications since the first edition this new edition reviews all past and present classes of production chemicals providing numerous difficult to obtain references especially SPE papers and patents Unlike other texts that focus on how products perform in the field this book focuses on the specific structures of chemicals that are known to deliver the required or desired performance information that is very useful for research and development Each updated chapter begins by introducing a problem such as scale or corrosion for which there is a production chemical The author then briefly discusses all chemical and nonchemical methods to treat the problem and provides in depth descriptions of the structural classes of relevant production chemicals He also mentions when available the environmental properties of chemicals and whether the chemical or technique has been successfully used in the field This edition includes two new chapters and nearly 50 percent more references      **Data on Federal Research and Development Investments** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Modernizing the Infrastructure of the National Science Foundation Federal Funds Survey, 2010-01-27 Two surveys of the National Science Foundation's Division of Science Resources Statistics SRS provide some of the most significant data available to understand research and development spending and policy in the United States These are the Survey of Federal Funds for Research and Development and the Survey of Federal Science and Engineering Support to Universities Colleges and Nonprofit Institutions These surveys help reach conclusions about fundamental policy questions such as whether a given field of research is adequately funded whether funding is balanced among fields and whether deficiencies in funding may be contributing to a loss of U S scientific or economic competitiveness However the survey data are of insufficient quality and timeliness to support many of the demands put on them In addition the surveys are increasingly difficult to conduct in times of constrained resources and their technological procedural and conceptual infrastructure has not been modernized for procedure or content Data on Federal Research and Development

**Democracy Promotion in the EU's Neighbourhood** Sandra Lavenex, Frank Schimmelfennig, 2013-09-13 EU external democracy promotion has traditionally been based on linkage i e bottom up support

for democratic forces in third countries and leverage i.e the top down inducement of political elites towards democratic reforms through political conditionality The advent of the European Neighbourhood Policy and new forms of association have introduced a new third model of democracy promotion which rests in functional cooperation between administrations This volume comparatively defines and assesses these three models of external democracy promotion in the EU's relations with its eastern and southern neighbours It argues that while linkage has hitherto failed to produce tangible outcomes and the success of leverage has basically been tied to an EU membership perspective the governance model of democracy promotion bears greater potential beyond the circle of candidate countries This third approach while not tackling the core institutions of the political system as such but rather promoting transparency accountability and participation at the level of state administration may turn out to remain the EU's most tangible form of democratic governance promotion in the future This book was originally published as a special issue of Democratization
