Inclusive Education at the Crossroads Philippa

Gordon-Gould, Garry Hornby, 2023-03-09 Inclusive Education at the Crossroads explores the short and long term effectiveness of government plans to reform policy for special needs education confronting difficult questions on policies about inclusion and suggesting alternative ways forward for achieving more effective education of children with special educational needs and disabilities SEND Inclusion has been a central concern for education systems globally for over three decades However has preoccupation with inclusion been at the expense of effective education for children with SEND Where do policies for inclusion lead and do they amount to the special education reform that is needed What do the worldwide experiences of inclusion and special education reveal about how to improve the quality of education systems for all children in the future How effective is provision for children with SEND today Through this informative and topical book Gordon Gould and Hornby shine an interrogating spotlight on current provision for SEND and ask if current legislation and policy inadvertently reinforce problems if they cause many children with SEND to fall short of their potential as well as preventing many schools from improving their levels of overall academic attainment Inclusive Education at the Crossroads provides theory and research for teachers school leaders governors policy makers researchers parents post graduate students and anyone seeking practical solutions to meeting the needs of pupils with SEND in any global context It will encourage open debate about the essence of educational inclusion in order to stimulate creative thinking among all stakeholders Charged Particles in Oncology Marco Durante, Francis A. Cucinotta, Jay S. Loeffler, 2018-01-31 High energy charged particles represent a cutting edge technique in radiation oncology Protons and carbon ions are used in several centers all over the world for the treatment of different solid tumors Typical indications are ocular malignancies tumors of the base of the skull hepatocellular carcinomas and various sarcomas The physical characteristics of the charged particles Bragg peak allow sparing of much more normal tissues than it is possible using conventional X rays and for this reason all pediatric tumors are considered eligible for protontherapy Ions heavier than protons also display special radiobiological characteristics which make them effective against radioresistant and hypoxic tumors On the other hand protons and ions with high charge Z and energy HZE particles represent a major risk for human space exploration The main late effect of radiation exposure is cancer induction and at the moment the dose limits for astronauts are based on cancer mortality risk The Mars Science Laboratory MSL measured the dose on the route to Mars and on the planet's surface suggesting that a human exploration missions will exceed the radiation risk limits Notwithstanding many studies on carcinogenesis induced by protons and heavy ions the risk uncertainty remains very high In this research topic we aim at gathering the experiences and opinions of scientists dealing with high energy charged particles either for cancer treatment or for space radiation protection Clinical results with protons and heavy ions as well as research in medical physics and pre clinical radiobiology are reported In addition ground based and spaceflight studies on the effects of space radiation are included in this book Particularly relevant for space studies are the clinical results on normal tissue complications and second cancers The eBook nicely demonstrates that particle therapy in

oncology and protection of astronauts from space radiation share many common topics and can learn from each other
