Lifesciences Paper2 2013 Finalpaper Grade11:

Technologies in Biomedical and Life Sciences Education Harry J. Witchel, Michael W. Lee, 2022-06-24 This contributed volume focuses on understanding the educational strengths and weaknesses of mediated content including media as a learning supplement in comparison to traditional face to face learning Each chapter includes research on and a broad brush summary of approaches to combining life sciences education with educational technologies The chapters are organized into four main sections each of which focuses on a key question regarding the consequences of incorporating media into education In this regard the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity Further they address the ongoing discussion as to whether students need to be present for lectures and on how having agency in their own learning can improve both retention and conceptual understanding To link the content to current events the authors also shed light on the impact that the COVID 19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies Consequently the book offers life science educators valuable guidance on the technologies already available and an outlook on what is yet to come *Collected Papers. Family Life, Family Law, and Family Justice Marsha Garrison, 2022-10-28 *Family Life Family Law and Family Justice* Tying the Knot combines history social science and legal analysis to chart the evolution and interdependence of family life and family law portray current trends in family life explain the pressing policy challenges these trends have produced and analyze the changes in family law that are essential to meeting these challenges The challenges are large and

pressing Across the industrialized West nonmarital birth relational stress multi partner fertility and relationship dissolution have increased producing a dramatic rise in single parenthood poverty and childhood risk This concentration of familial and economic risk accelerates socioeconomic inequality and retards intergenerational mobility Although the divide is most pronounced in the United States the same patterns now affect families throughout the Western world Across the European Union there are 9.2 million lone parents and just under half of their families live in poverty Tying the Knot demonstrates how today's family patterns are deeply rooted in long standing class based differences in family life and explains why these class based differences have accelerated It explains how the values that guide family law development inevitably reflect the world in which families live and develops a new family law capable of meeting the needs of twenty first century families The book will be of considerable interest to family specialists from a number of fields including law demography economics history political science public health social policy and sociology

Canine Olfaction Science and Law Tadeusz Jezierski, John Ensminger, L. E. Papet, 2016-04-20 The value of the canine nose is well documented and working dogs are being utilized for their olfactory skills in an increasing number of fields Not only are dogs used by police security and the military but they are also now used in forensic science in medical detection of disease in calculating population trends of endangered species and eradicating invasive species in protected environments and in identifying infestations and chemical contaminants Edited and contributed to by eminent scholars *Canine Olfaction Science and Law Advances in Forensic Science Medicine Conservation and Environmental Remediation* takes a systematic scientific approach to canine olfaction It includes work from scientists working in pure and applied disciplines trainers and handlers who have trained and deployed detection dogs and lawyers who have evaluated evidence produced with the aid of detection and scent identification dogs The book is divided into six sections covering The anatomy genetics neurology and evolution of canine olfaction as well as diseases affecting it The chemistry and aerodynamics of odors Behavior learning and training Uses of canine olfaction in forensics and law Uses in conservation and remediation Uses in detection of diseases and medical conditions The various contributors describe cutting edge research some conclusions of which are the subject of vigorous debates between various laboratories and researchers The editors have added cross references so that readers can consider the different perspectives that are currently being advanced and understand where consensus is being built and where more research needs to be done A useful practical reference *Canine Olfaction Science and Law* provides a wealth of information beneficial to a wide range of disciplines It aids trainers and handlers of detection dogs as well as various professionals in healthcare law enforcement forensic science and environmental conservation to gain a better understanding of the remarkable power of the canine nose while encouraging further advances in applications
