*Literacy in Australia* Amy Seely Flint, Mark Vicars, Amanda Muscat, Maria Bennet, Robyn Ewing, Kylie Shaw, Lisa Kervin, Jessica Mantei, Jeanne Iorio, Catherine Hamm, Mitchell Parker, Marcelle Cacciattolo, Lawry Mahon, Sarah Tartakover, 2024-02-20 Infused with our authors personal experiences teaching Literacy in Australia 4th Edition is delivered as a full colour printed textbook with an interactive eBook code included With a prioritised focus on the Aboriginal and Torres Strait Islander histories and cultures featured throughout the text and a greater focus on using ICT in the classroom pre service teachers will be well equipped with the knowledge of what kinds of activities they can include in and out of the classroom for an enriching learning experience for their students     Structuring the Thesis David Kember, Michael Corbett, 2018-07-23 The book is a collective investigation of the structuring of theses in education the social sciences and other disciplines that commonly do not follow the standard procedures of the scientific method To help research students design a structure for their own thesis and liberate their investigations from the constraints associated with the use of the conventional structure it explains how the structures adopted were designed to suit the topic methodology and paradigm It also provides a wide range of examples to draw upon which suit a broad spectrum of theory methodological approaches research methods and paradigms Additionally by analyzing the methodologies and paradigms and reviewing the methodological and paradigmatic spectrum it offers a significant contribution to the way research is conceptualized The book addresses a number of key questions faced by students supervisors and examiners Why do examiners often find it difficult to read work in non scientific disciplines when theses are structured in accordance with the conventional scientific method Why do students in non scientific disciplines struggle to write up the outcomes of their research in the conventional structure What alternative thesis structures can be devised to better suit the wide range of methods Which theories and paradigms are commonly followed in education and the social sciences and how do these perspectives influence the research process What methods theories and paradigms are commonly adopted by education and social science students and what problems do these pose when students write their theses     **Reinventing the Curriculum** Mark Priestley, Gert Biesta, 2013-06-20 Scotland's Curriculum for Excellence offers an example of a different approach to national curriculum development It combines what are claimed to be the best features of top down and bottom up approaches to curriculum development and provides an indication of the broad qualities that school education should promote rather than a detailed description of curriculum content Advocates of the approach argue that it provides central guidance for schools and maintains national standards whilst at the same time allowing schools and teachers the flexibility to take account of local needs when designing programmes of education Reinventing the Curriculum uses Scotland's Curriculum for Excellence as a rich case study analysing the strengths and weaknesses of this approach to curriculum design and development and exploring the implications for curriculum planning and development around the world     **Stimulating Non-Fiction Writing!** Emma

Testing Regimes, Accountabilities and Education Policy Bob Lingard, Goli Rezai-Rashti, Wayne Martino, 2017-10-02 Around the globe various kinds of testing including high stakes national census testing have become meta policies steering educational systems in particular directions and having great effects on schools and on teacher practices as well as upon student learning and curricula There has also been a complementary global aspect to this with the OECD's PISA and IEA's TIMSS and PIRLS which have had impacts on national education systems and their policy frameworks While there has been a globalized educational policy discourse that suggests that high stakes standardised testing will drive up standards and enhance the quality of a nation's human capital and thus their international economic competitiveness this discourse still manifests itself in specific vernacular path dependent ways in different nations High stakes testing and its effects can also be seen as part of the phenomenon of the datafication of the world and policy as numbers linked to other reforms of the state including new public management network governance and top down and test based modes of accountability This edited collection provides theoretically and empirically informed analyses of these developments This book was originally published as a special issue of the *Journal of Education Policy*
