NARRATIVE REPORT
on National Simultaneous Earthquake Drill
September 7, 2023

National Simultaneous Earthquake Drill is organized to increase public knowledge of earthquake preparedness and reaction. This activity strives to instruct and prepare learners, communities, and organizations on how to respond appropriately in the case of a seismic disaster.

The main goal was to evaluate and enhance the various earthquake response methods, prepared by SNES SDRRM Team. Evaluations of evacuation protocols, communication protocols, and the efficiency of emergency response teams were among the specific objectives. To give students a genuine experience, a simulated earthquake scenario was started at the appointed time.

Teachers, non-teaching personnel and the learners followed pre-established evacuation routes to reach safe assembly areas. First responders and emergency personnel executed their duties, such as search and rescue, medical aid, and fire suppression, as if it were a real disaster. Communication systems were tested, including the use of emergency radios, mobile phones, and public address systems to ensure that information flowed efficiently. The exercise also highlighted areas that still need to be improved, such as the significance of continual training and the requirement for better communication mechanisms.

Learners in Grade III followed the practice both inside and outside of the classroom as well as to the evacuation zones with the assistance of their advisers. Students were frequently provided the lesson so they could follow it correctly. Afterward, crouch down to the ground, hide under a solid desk or table, and hang on until the shaking stops. Earthquake drills are immersions; therefore, actions and reactions will be instinctual if the children have been taught what to do or how to react. Earthquake preparation should be taught to the students well and should be observed attentively during drill.

During the drill, nothing undesirable occurred. In the end, it did out to be a success. Preparedness and disaster risk reduction are the two main strategies.

An evaluation session was held in the SNES gym following the drill to determine how well the response worked. Teachers and learners were instructed on what to do in case of emergency. They offered feedback, which will be included into future earthquake preparedness strategies to make the required corrections.
