Love is Green: Compassion as responsibility in the ecological emergency Lucy Weir, 2020-01-31 This book links three themes non dualistic agency the good of systems and compassionate attunement and relates them to the ecological emergency The author begins by examining how we currently understand our ability to choose what we do our agency and

conclude that this is dualistic we think of an action to do and then we physically act Yet an understanding that we are enmeshed in context means our capacity to act freely dissolves in the mesh We evolved capacities for consciousness and awareness capacities that allow us to realise that we are here now but that do not inevitably imply choice Our capacity for realisation gives us the ability to elicit an emotional response When we understand our enmeshment we can attune to a deep compassion for ourselves and indeed for all systems unfolding through time Compassionate attunement allows a different set of options for action to become available to us This then shifts how we respond to ourselves our human relationships and to the ecological emergency we are currently embroiled in This work is inspired by the great Kamakura Zen Master Eihei D gen The book s contribution is to extend and link the notion of practice realisation with the literature on evolutionary biology and entropy maximisation which allows us to speak of the good of systems Systems unfold as good for us when biodiversity maximisation occurs By considering the ecological emergency in light of compassionate attunement we open ourselves to a new array of possibilities for action Some of these the author outlines in the conclusion relating them to existing literature on compassionate achievement and compassionate communication to show how our this practice shifts our relationship to ourselves to one another and to the ecological emergency thus changing the course of human history Indian National

them and even confront them in verbal or physical ways The purpose of this volume is to offer an academically informed yet practically oriented collection of essays that challenges and encourages Christians to engage their religious neighbors in a much more loving compassionate hopeful and courageous indeed orthopathic manner whether in the realm of politics in debate and conference venues on the mission field or in their own homes schools churches and neighborhoods As such a set of reflection and discussion questions is included to facilitate individual and or group study The Visual Life of Climate Change Saffron O'Neill, 2025-12-08 Available open access digitally under CC BY NC ND licence Images can play a key role in communication but climate change imagery can be formulaic and narrow in perspective Going beyond polar bears and wildfires this book is a manifesto for opening up the visual discourse on climate Rather than portraying scenarios that can be remote from many people's lives Saffron O'Neill shows how images can be powerful tools to engage viewers and enable them to connect different issues together With engaging case studies and practical advice throughout the book shows how visuals can represent climate change in more diverse equitable inclusive and responsible ways **The Publishers' Circular and Booksellers' Record**, 1919 Climate Change and Cities Cynthia Rosenzweig, William D.
