It's written to show how group work really works and ensures readers an understanding of how to create and maintain a group environment that actually succeeds in helping its members achieve significant growth and change. It emphasizes unique group processes and a systemic perspective, asserting that the quality of members' interactions

is the critical determinant of a group's progress. It addresses all of the essential tasks in planning, conducting, and concluding groups. Other topics include teaching essential membership skills, how to teach group members interaction skills to assist them in personal growth, and the process of becoming an effective leader. Coverage includes Eastern theories, feminist theories, body-centered, and Rational-Emotive Behavioral Theory. For anyone interested in pursuing a career in counseling and psychotherapy.

Counseling, Psychology, and Children William G. Wagner, 2003. Bananas and plantains are major fruit crops in the tropics and subtropics, making a vital contribution to the economies of many countries. In the last 15 years, substantial changes have occurred in banana production, among them the increased importance of fungal and viral diseases and their serious impact on Cavendish export cultivars, smallholder plantains, and cooking bananas. Changes in production systems, such as protected greenhouse cultivation, organic fair trade, and integrated cultivation, and their respective certification schemes, have also become prominent. This book provides an accessible review of the scientific principles of banana production and how these relate to field practices. This new edition has expanded coverage of world trade statistics and policies, breeding of new cultivars in relation to disease resistance, and markets, prospects for genetically modified bananas, and the increasing role of endophytes in controlling pests and diseases.

This is one of the most comprehensive, thorough, and readable books on the market today. After a thorough discussion of ethical principles and standards, the authors conscientiously examine ethical issues as they manifest themselves within several specialty areas: family counseling and school counseling, for example. They again include their highly praised compendium of ethical codes, ideal for study by future counselors or as a reference for practitioners. This book addresses high-interest topics such as genetics, eugenics, and managed care. It examines the variables and nuances of counseling clients of various ethical and cultural backgrounds. It also covers everything from office layout to maintaining records, from setting fees and billing to handling disagreements, computer-assisted counseling, online forums, and computer-assisted assessment.
