Pre-budget Report 2009 Great Britain: Parliament: House of Commons: Treasury Committee, 2010 This report acknowledges that deciding the right time for fiscal consolidation requires making a fine judgement about the resilience of the recovery It emphasises that a plan to restore the health of the public finances must deal with the structural deficit While the Treasury aims to cut the deficit from 9% of GDP to 3.6% of GDP in four years the expert witnesses who examined it all criticised the document for not providing enough information about how this will be achieved Future Budgets and PBRs should attempt to quantify the downside risks around the structural deficit forecast There will be uncertainty in these figures but they are produced as part of the Spending Review process so there appears to be no argument against their publication Similarly the Bank of England publishes forecasts showing the possible range of inflation rates and publishing information about debt interest on a similar basis would be useful The recession appears to have had substantially less impact on the labour market than might have been feared though concern remains about the level of youth unemployment Repossessions have been far lower than expected however it is recommended that the Treasury proceeds cautiously over the timing of removal of Government support in this area We do not want to see a return to the times of easy credit but the Government needs to remain aware of the risk that lending will not support renewed private sector growth as the public sector retrenches The purpose of the tax on bank bonuses is to change behaviour so that banks increase their capital rather than providing large discretionary payments to employees The next Parliament needs to examine the effectiveness of any regime introduced by the Financial Services Bill in terms both of its success in altering bank behaviour and of its effect on the competitiveness of the UK financial sector Internal Audit Practice from A to Z Patrick Onwura Nzechukwu, 2016-11-25 This book addresses the practice of internal auditing using GAAS Generally Accepted Auditing Standards GAGAS Generally Accepted
