3. Clean inside cover (A) with brush or cleaning.
4. Clean area around muffler (B) and under chassis (C).

Adjusting Ground Speed Control

MO35561

Picture Note: Operator Presence Control shown in released position.

When the operator presence control (A) is held back, against the drive handle (B), and the drive handle is moved forward, the drive system is engaged. Pushing the drive handle further forward increases the ground speed. Pulling the drive handle back decreases ground speed and will ultimately disengage the drive system.

This occurs because the drive handle is connected to the traction drive belt sensing mechanism by a cable (C) that runs under the left side of the handle assembly. As the drive belt wears, belt tension decreases, and ground speed at a given drive handle position changes.

If top ground speed of the mower has decreased due to belt stretch or wear, the drive cable (C) must be adjusted to increase belt tension.

To adjust drive cable:

MO35561

1. Locate the drive cable (C) and thumbwheel adjuster (B) under the left side of the handle assembly.

NOTE: Descriptions are based on the operator facing forward in cutting position.

2. Rotate the thumbwheel upward (counter-clockwise) to increase belt tension.
3. Start engine and check that drive system operates properly and pulls the mower in cutting conditions when drive handle is engaged.
- NOTE:** Drive system should disengage when drive handle is pulled off the way back.
4. If drive system does not disengage when drive handle is pulled off the way back, adjust thumbwheel (downward clockwise) to decrease belt tension. Start engine and check for proper disengagement.

Replacing Drive Belt (J526)

Removing Drive Belt

CAUTION: Avoid injury! Stop engine and wait for all moving parts to stop before doing any service or adjustments on the machine. Disconnect spark plug and wait for all components to cool before working on machine.

1. Park machine safely. (See Parking Safety in the Safety Section.)
2. Remove the grass bag, if attached.

CAUTION: Avoid injury! Blades are sharp. Always wear gloves when handling blades or working near blades.

IMPORTANT: Avoid damage! To help prevent air cleaner damage and hard starting, turn mower so the muffler side is down.

NOTE: Be sure the spark plug is disconnected and the fuel tank is at least half empty before turning mower on its side.

3. Tip mower over to rest on its side with the muffler down. Blades can be placed under the handle bracket to keep the area tightly elevated.
