Andrey O. Matveev

Maclaurin Mathematics Olympiad Paper 2014:

Symmetric Cycles Andrey O. Matveev, 2023-10-06 This original research monograph concerns various aspects of how based on the decompositions of vertices of hypercube graphs with respect to their symmetric cycles the vertex sets of related discrete hypercubes as well as the power sets of the corresponding ground sets emerge from rank 2 oriented matroids from underlying rank 2 systems of linear inequalities and thus literally from arrangements of straight lines crossing a common point on a piece of paper It reveals some beautiful and earlier hidden fragments in the true foundations of discrete mathematics The central observation made and discussed in the book from various viewpoints consists in that $2t$ subsets of a finite t element set E_t which form in a natural way a cyclic structure well just t subsets that are the vertices of a path in the cycle suffice allow us to construct any of $2t$ subsets of the set E_t by means of a more than elementary voting procedure expressed in basic linear algebraic terms The monograph will be of interest to researchers students and readers in the fields of discrete mathematics theoretical computer science Boolean function theory enumerative combinatorics and combinatorics on words combinatorial optimization coding theory and discrete and computational geometry Competitions for Young Mathematicians Alexander Soifer, 2017-06-15 This book gathers the best presentations from the Topic Study Group 30 Mathematics Competitions at ICME 13 in Hamburg and some from related groups focusing on the field of working with gifted students Each of the chapters includes not only original ideas but also original mathematical problems and their solutions The book is a valuable resource for researchers in mathematics education secondary and college mathematics teachers around the globe as well as their gifted students Schur-Convex Functions and Inequalities Huan-nan Shi, 2019-06-17 This two volume work introduces the theory and applications of Schur convex functions The first volume introduces concepts and properties of Schur convex functions including Schur geometrically convex functions Schur harmonically convex functions Schur power convex functions etc and also discusses applications of Schur convex functions in symmetric function inequalities **Informatics in Schools. Curricula, Competences, and Competitions** Andrej Brodnik, Jan Vahrenhold, 2015-09-23 This book constitutes the refereed proceedings of the 8th International Conference on Informatics in Schools Situation Evolution and Perspectives ISSEP 2015 held in Ljubljana Slovenia in September October 2015 The 14 full papers presented together with 3 invited talks were carefully reviewed and selected from 36 submissions The focus of the conference was on following topics sustainable education in informatics for pupils of all ages connecting informatics lessons to the students everyday lives teacher education in informatics and research on informatics in schools empirical qualitative quantitative theory building research methods comparative studies transferability of methods and results from other disciplines *Computations and Computing Devices in Mathematics Education Before the Advent of Electronic Calculators* Alexei Volkov, Viktor Freiman, 2019-01-11 This volume traces back the history of interaction between the computational or algorithmic aspects of elementary mathematics and mathematics education throughout ages More specifically the examples

of mathematical practices analyzed by the historians of mathematics and mathematics education who authored the chapters in the present collection show that the development and in some cases decline of counting devices and related computational practices needs to be considered within a particular context to which they arguably belonged namely the context of mathematics instruction in their contributions the authors also explore the role that the instruments played in formation of didactical approaches in various mathematical traditions stretching from Ancient Mesopotamia to the 20th century Europe and North America
