For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this handbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa s contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists **The Future of the South African Political Economy Post-COVID 19** Mzukisi Qobo,Mills

Global Finance and Development David Hudson,2014-11-27 The question of money how to provide it and how to acquire it where needed is axiomatic to development The realities of global poverty and the inequalities between the haves and the have nots are clear and well documented and the gaps between world s richest and the world s poorest are ever increasing But even though funding development is assumed to be key the relationship between finance and development is contested and complex This book explores the variety of relationships between finance and development offering a broad and critical understanding of these connections and perspectives It breaks finance down into its various aspects with separate chapters on aid debt equity microfinance and remittances Throughout the text finance is presented as a double edged sword while it is a vital tool towards poverty reduction helping to fund development more critical approaches remind us of the ways in which finance can hinder development It contains a range of case studies throughout to illustrate finance in practice including UK aid to India debt in Zambia Apple s investment in China microfinance in Mexico government bond issues in Chile and financial crisis in East Asia The text develops and explores a number of themes throughout such as the relationship between public and private sources of finance and debates about direct funding versus the allocation of credit through commercial financial markets The book also explores finance and development interactions at various levels from the global structure of finance through to local and everyday practices Global Finance and Development offers a critical understanding of the nature of finance and development This book encourages the reader to see financial processes as embedded within the broader structure of social relationships Finance is defined and demonstrated to be money and credit but also crucially the social relationships and institutions that enable the creation and distribution of credit and the consequences thereof This valuable text is essential reading for all those concerned with poverty inequality and development
