Made To Die Blood Ties English Edition:

Blood Ties and Fictive Ties Kristin Elizabeth Gager, 2014-07-14 In Paris during the sixteenth and seventeenth centuries the practice of adopting children was strongly discouraged by cultural religious and legal authorities on the grounds that it disrupted family blood lines In fact historians have assumed that adoption had generally not been practiced in France or in the rest of Europe since late antiquity Challenging this view Kristin Gager brings to light evidence showing how married couples and single men and women from the artisan neighborhoods in early modern Paris did manage to adopt children as their legal heirs In so doing she offers a new richly detailed portrait of family life civil law and public assistance in Paris and reveals how citizens forged a wide variety of family forms in defiance of social cultural and legal norms Gager bases her work on documents ranging from previously unexplored notarized contracts of adoption to court cases theological treatises and literary texts She examines two main patterns of adoption those privately arranged between households and those of destitute children from the Parisian foundling hospice and the H tel Dieu Gager argues that although customary law rejected adoption and promoted an exclusively biological model of the family there existed an alternative domestic culture based on a variety of fictive ties Gager connects her arguments to current debates about adoption and the nature of the family in Europe and the United States Originally published in 1996 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Blood Ties Karen E. Taylor, 1995 At the request of a secret society of ancient vampires Deidre and her detective lover are back on the streets of New York trying to get to the bottom of a murder spree that s taking the life of vampires as well as humans This time around Mitch and Deidre are not only hunters but also the prey

The Sphere ,1920 *A Century of Moravian Sisters* Elizabeth Fetter Lehman Myers, 1918 **A Delicate Choreography** David Sabeau, 2023-10-24 The origins of the incest taboo have puzzled many of the most influential minds of the West from Plutarch to St Augustine St Thomas Aquinas Martin Luther David Hume Lewis Henry Morgan Sigmund Freud Emile Durkheim Edward Westermarck and Claude L vi Strauss This book puts the discussion of incest on a new foundation It is the first attempt to thoroughly examine the rich literature from philosophical theological and legal treatises to psychological and biological

genetic studies to a wide variety of popular cultural media over a long period of time The book offers a detailed examination of discursive and figurative representations of incest during five selected periods from 1600 to the present The incest discussion for each period is complemented with a presentation of dominant kinship structures and changes without arguing for causal relations Part I deals with the legacy of ecclesiastical marriage prohibitions of the Middle Ages Historians dealing with the Reformation have wondered about the political and social implications of theological debates about the incest rules the Enlightenment opted for sociological considerations of the household and a new anthropology based on the passions Baroque discourse focused upon sexual relations among kin by marriage while Enlightenment and Romantic discussions worried the intimacy of siblings The first section of Part II deals with the six decades around 1900 during which European and American cultures obsessed about the sexuality of women Almost everyone concurred in the idea that mother made the family what it was that she configured the household kept the lines of kinship vibrant and stood at the threshold as stern gatekeeper and many thought that she managed these tasks through her sexuality and an eroticized relationship with sons Another story line taken up in the section Intermezzo this one about the physical and mental consequences of inbreeding appeared after 1850 To what extent do close kin marriages pose risks for progeny At its center lay the incest problematic now restated Is avoidance of kin genetically programmed Do all cultures know about risks of consanguinity As for the twenty first century evolutionary and genetic assumptions are challenged by a living world population containing roughly one billion offspring of cousin marriages Part III deals with one of the perhaps most remarkable reconfigurations of Western kinship in the aftermath of World War I The shift from an endogamous to an exogamous alliance system centered on the nuclear family An historical anomaly this family form began to dissolve almost as soon as it came together and in the process shifted the focus of incest concerns to a new pairing father and daughter By the 1970s when the father daughter problematic swept all other considerations of incest aside that relationship had come to be modeled for the most part around power and its abusive potential As for incest its representations in the last three decades of the twentieth century no longer focused on biologically damaged progeny but rather on power abuses in the nuclear family sexual abuse By the mid 1990s Western culture at least partly redirected its gaze away from father and daughter towards siblings especially towards brothers and sisters and the sexual boundaries and erotics of their relationships Correspondingly siblings became a model organism for psychotherapy evolutionary biology and the science of genetics
