 Dimitrios Buhalis,Simon Darcy,2011 Inclusion disability an ageing population and tourism are increasingly important areas of  
 study due to their implications for both tourism demand and supply This book therefore sets out to explore and document the  
 current theoretical approaches foundations and issues in the study of accessible tourism In drawing together the  
 contributions to this volume the editors have applied broader social constructionist approaches to understanding the  
 accessible tourism phenomena Accessible tourism as with any area of academic study is an evolving field of academic  
 research and industry practice As with other areas of tourism the field is multidisciplinary and is influenced by various

disciplines including geography disability studies economics public policy psychology and marketing As one would expect from two scholars at the height of their academic abilities Dimitrios Buhalis and Simon Darcy have delivered a timely and much needed contribution to the under served area of accessible tourism Harnessing the best conceptual developments on the topic Accessible Tourism is a scholarly yet hugely readable collection and readily communicates the various contributors passion for and command of their subject This collection is a must have text for anyone engaged in the theory practice and policy of accessible tourism and will be essential reading on undergraduate and postgraduate courses across a range of disciplines and fields I cannot speak highly enough of this endeavour and I m sure it will take accessible tourism and universal design debates into the mainstream of academic enquiry and industry practice Professor Nigel Morgan The Welsh Centre for Tourism Research University of Wales Institute Cardiff Wales
