Pro WF 4.5 Bayer White, 2013-04-10 In Pro WF 4.5 you'll find the insight and direction for understanding how to build workflows using WF 4.5 and host them as long running services using Microsoft's Windows Server for on premises work and Azure AppFabric for hosting workflows in the cloud With the concept of cloud computing using Windows Azure and the maturity of Windows Server technology workflow services can be hosted with first class service monitoring with less overhead from a developer's perspective Building workflows in a declarative fashion and hosting them as services is a natural way for building business logic that is tiered away from running applications that subscribe to them therefore providing flexibility for when business processes change In Pro WF 4.5 author Bayer White walks you as the developer through the steps and explains the concepts of declaratively modeling domain specific business processes that can be hosted and exposed
