asymmetries in the worldwide adjustment mechanism are inherent in the international monetary system The recent theoretical literature dealing with the rules vs discretion debate and its interaction with the credibility issue is reviewed This topic is intrinsically related to the dispute over the appropriate role of exchange rate anchors in disinflation programmes Against a background of academic dispute between advocates of exchange rate prescriptions and monetary conceptions the contrasting views of different theorists regarding the choice of exchange rate regimes are presented and assessed Finally a comparative analysis of recent experiments in Argentina Brazil Chile and Mexico with exchange rate based disinflation stabilization programmes is undertaken The problems that have arisen while establishing new institutional arrangements such as new currency or a policy rule for monetary base creation are examined
