Grinin, Leonid, 2012-06-01 The present monograph considers some macrohistorical trends along with the aspects of globalization. Macrohistory is history on the large scale that tells the story of the entire world or of some major dimensions of historical process. For the present study three aspects of macrohistory have been chosen: These are technological and political aspects as well as the one of historical personality. Taken together they give a definite picture of unfolding historical process which is described from the beginning of human society formation to the present day and near future. The combination in the monograph title of the two terms macrohistory and globalization is in no way artificial. On the contrary the connection of these terms is organic at least as the real goal of macrohistory is to find meaning in the past so as to create new possibilities of meaning for the future. The analysis of globalization also includes three aspects: political, economic and futurological as today the world may well be regarded as being at the start of a new global reconfiguration. The author presents his ideas of the world prospective, political and in some respects social economic development basing on the analysis of macrohistory and contemporary globalization processes. The monograph also considers some global scenarios of the World System's near future. **Macroeconomics Brief Edition** Campbell R. McConnell, Stanley L. Brue, Sean Masaki Flynn, Dr., 2012-02-07

Rethinking Sustainable Development Seck

TAN, 2024-06-03 This book demonstrates falsified economic performance of global economies when the environment is not recognised as a capital and when the ecosystem is overlooked towards sustainable development. Seck begins with an analysis of standard macroeconomic framework and policy practice. He argues with reference to environmental accounting literature that environmental capital must form an integral component of economic measurement. This paves the way for an alternative environmental macroeconomics framework for policy analysis that promotes sustainable development. The book demonstrates how environmental capital can be measured with reference to select OECD countries and provides a methodology for analysing how macroeconomic goals are related to a steady state economy. Seck then concludes with a summary of the conflict between current economic growth and ecosystem preservation and outlines possible policy improvements and directions for research. *Rethinking Sustainable Development* is an invaluable reference for policymakers as well as researchers and students of environmental economics, sustainable development and macroeconomics.

KONDRATIEFF

WAVES Leonid E. Grinin, Tessa C. Devezas, Andrey V. Korotayev, Sergey Yu. Malkov, Arno Tausch, Brian J. L. Berry, Euel Elliott, Marco Gallegati, Zenonas Norkus, Valentina M. Bondarenko, Stephen I. Ternyik, Elżbieta Mączyńska, William R.

Thompson, Leo Nefiodow, Anthony Harper, Though the researchers of the theory of long and medium term cycles are certainly worried about the economic situation they understand that the cyclicity still remains an inevitable attribute of economic development. And Juglar's aphorism that crisis is a consequence of the preceded prosperity is still true. In this third issue of the Yearbook *Kondratieff Waves* with the subtitle *Cycles, Crises and Forecasts* we present a number of insight contributions on nature, regularities and interconnections among cycles of different duration. Some economic cycles may result in a severe economic crisis. The current one shows once again the importance of the study of cyclical dynamics and its peculiarities. Between the 1980s and 1990s the Keynesian receipts were replaced by neoliberal and monetarist ones which seemed to be miraculous as well. The depleted growth was marked with the largest global crisis of 2008 which also showed that within globalization when regulation in the international arena is impossible yet there recur the signs of Juglar cycles of the 19th

and first half of the 20th centuries with their uncontrollable upwards and sharp declines evolving into collapses and panic. This is supported by the fact that for eight years the world has been at the depressive phase. This edition will be useful for economists, social scientists as well as for a wide range of those interested in the problems of the past, present and future of global economy and globalization. This research has been supported by the Russian Foundation for the Humanities Project No 16-02-14053.
