Macroeconomic Analysis in the Classical Tradition James C W Ahiakpor, 2021-03-22 Macroeconomic Analysis in the Classical Tradition explains how the influence of Keynes's macroeconomics including his changed definitions of some key macroeconomic concepts has impeded many analysts' ability to readily resolve disputes in modern macroeconomics. Expanding on his earlier work Macroeconomics without the Errors of Keynes 2019, the author delves into more aspects of macroeconomic theory and argues for a revision of Keynes's contribution to the field. Attention is given to theories and concepts such as Say's Law, the quantity theory of money, the liquidity trap, the permanent income hypothesis, 100% money, and the Phillips curve analysis. The chapters work to build a careful critique of Keynes's economics and make the case that the classical macroeconomics of Smith, Say, Ricardo, Mill, and others could help resolve present-day policy disagreements and redefine macroeconomic priorities. This book provides essential reading for advanced students and scholars with an interest in the foundations of Keynes's theories and current debates within macroeconomic policy. **Books in Print**, 1991

Microeconomics Michael L. Katz, 1994 **Economics** Ronald M. Ayres, Robert A. Collinge, 2005 This easy-to-read accessible macro first principles book engages readers with familiar real-world examples and applications that bring economics to life. The authors follow an Explore and Apply theme that shows learners how economics is a part of their everyday lives and how it can be a useful tool in making personal decisions and evaluating policy decisions. The Enhanced Edition contains more detail and more in-depth coverage of key economic concepts, expanded multiplier coverage, new coverage of crowding out, greater detail on exchange rates, more extensive treatment of antitrust, and much more. For individuals interested in the principles of economics and how those principles effect the details of daily living.

Microeconomics Karen Katz, 1994 **Applied Microeconomics** Jonas Prager, 1993 Comparative Economic Systems Morris Bornstein, 1994 Comprises essays grouped under four main headings comparing economic systems: capitalist market economies, socialist market economies, and socialist planned economies and their reform. The British National Bibliography Arthur James Wells, 2009 *The Economics of Women, Men, and Work* Francine D. Blau, Marianne A. Ferber, Anne E. Winkler, 2002 This text is designed for courses concerned with the economic status of women, economics of gender, and economics of the family, but is also applicable to interdisciplinary women's studies courses, introductory level courses in economic problems, and as a supplement to general labour economics courses. The book draws into a single accessible volume a summary and synthesis of research and data from economics and other social sciences on women, men, and work in the labour market and household.
