MACROECONOMICS

Section II

Planning Time—10 minutes

Writing Time—50 minutes

Directions: You have 10 minutes to read all of the questions in this booklet, to sketch graphs, to make notes, and to plan your answers. You will then have 50 minutes to answer all three of the following questions. It is suggested that you spend approximately half your time on the first question and divide the remaining time equally between the next two questions. In answering the questions, you should emphasize the line of reasoning that generated your results; it is not enough to list the results of your analysis. Include correctly labeled diagrams, if useful or required, in explaining your answers. A correctly labeled diagram must have all axes and curves clearly labeled and must show directional changes. Use a pen with black or dark blue ink.

Debates in Macroeconomics from the Great Depression to the Long Recession Arie Arnon, 2022-05-06 This book assesses major schools of thought in macroeconomic theory between the Great Depression and the Long Recession focusing on their analysis of cycles crises and macro policy It explores the road from the dominance of Keynesian ideas to those of New Classical Macroeconomics NCM toward the end of the millennium The book covers the early influential work of Knut Wicksell the economic debates of the 1930s with core contributions from John Maynard Keynes and Friedrich von Hayek the rise of Keynesianism in the 1950s and its decline since the 1970s the rise of Monetarism in the 1960s and NCM s subsequent rise to prominence Finally the book outlines how macroeconomics has evolved from its birth in the 1930s as a theory separate from microeconomics resulting in a split between macro and micro theories and ended up with a new hegemonic paradigm based on microfoundations The ensuing policy thinking witnessed a transformation from active macro policy after the Great Depression to a far more passive macro policy during the last quarter of the twentieth century which may have contributed to missing the signs of the impending Long Recession of 2008 When the 2008 crisis struck macroeconomists were caught with models that were theoretically elegant yet inappropriate to the needs of the moment A broader historical perspective may have prevented the jettisoning of Keynesian models that had proved useful in the past and might have done so again This highly readable book by Arie Arnon is a wonderful antidote to economists short time horizon and contributes mightily to restore the profession s collective memory of the diversity of ideas within macroeconomics Professor Dani Rodrik Harvard Kennedy School
