Decomposition Applications in Image and Video Processing shows you how robust subspace learning and tracking by
decomposition into low rank and sparse matrices provide a suitable framework for computer vision applications
Incorporating both existing and new ideas the book conveniently gives you one stop access to a number of different
decompositions algorithms implementations and bench marking techniques Divided into five parts the book begins with an
overall introduction to robust principal component analysis PCA via decomposition into low rank and sparse matrices The
second part addresses robust matrix factorization completion problems while the third part focuses on robust online
subspace estimation learning and tracking Covering applications in image and video processing the fourth part discusses
image analysis image denoising motion saliency detection video coding key frame extraction and hyperspectral video
processing The final part presents resources and applications in background foreground separation for video surveillance
Features Provides a framework for computer vision applications including image processing and video surveillance Describes
many methods and algorithms to tackle different formulation problems such as robust PCA robust non negative matrix
factorization robust matrix completion subspace tracking and low rank minimization Presents an introduction for beginners
that reviews various decompositions loss functions optimization problems and solvers Offers software demos datasets and
codes on a supplementary website With contributions from leading teams around the world this handbook provides a
complete overview of the concepts theories algorithms and applications related to robust low rank and sparse matrix
decompositions It is designed for researchers developers and graduate students in computer vision image and video
