A Neuropsychologist's Guide to Training Psychometrists Christine S. Ghilain, 2021-12-24 A Neuropsychologist's Guide to Training Psychometrists Promoting Competence in Psychological Testing provides a framework for busy neuropsychologists faced with training their newly hired psychometrist. It supplies concrete guidelines and provides a roadmap for training that can be customized to any practice department or clinic setting. In this essential resource Dr. Christine S. Ghilain discusses the role of the psychometrist in various neuropsychological practice settings and provides suggested minimum standards of competence across training domains. She dives deeply into the core components of assessment from optimizing testing conditions to standardized test administration to keen observations of behavior and includes coverage of topics such as testing with unique populations, behavioral management strategies for challenging situations, as well as promoting ongoing competence over time. A compilation of several sources of data, the book includes excerpts from Dr. Ghilain's practice-specific psychometry training manual along with advice and illustrative examples from many neuropsychologists and psychometrists who shared their experiences. This book is an indispensable guide for neuropsychologists looking to instill high standards of competence in their hired professionals and for those involved in training graduate students who are just learning to administer cognitive tests. It is also of interest to other assessment-focused professionals looking to enhance their skills and refine their psychological testing knowledge.

Reading Programs for Young Adults Martha Seif Simpson, 2015-11-16 School and public libraries often provide programs and activities for children in preschool through the sixth grade, but there is little available to young adults. For them, libraries become a place for work, the place to research an assignment or find a book for a report, but the thought of the library as a place for enjoyment is lost. So how do librarians recapture the interest of teenagers? This just might be the answer. Here you will find theme-based units such as *Cartoon Cavalcade*, *Log On at the Library*, *Go in Style*, *Cruising the Mall*, *Space Shots*, *Teens on TV*, and 44 others that are designed for young adults. Each includes a display idea, suggestions for local sponsorship of prizes, a program game to encourage participation, 10 theme-related activities, curriculum tie-in activities, sample questions for use in trivia games or scavenger hunts, ideas for activity sheets, a bibliography of related works, and a list of theme-related films. The units are highly flexible, allowing any public or school library to adapt them to their particular needs.

Implementing Quality in Laboratory Policies and Processes Donnell R. Christian Jr., Stephanie Drilling, 2009-11-24 In order to gain accreditation, every laboratory must have a superior quality assurance program. The keys to a successful program are the operational and technical manuals and associated documents which define the program and its various components. Written by experts with global experience in setting up laboratories.
