

# Summit X450a Series

The Summit X450a series is based on Extreme Networks' revolutionary ExtremeOS operating system. ExtremeOS modular OS is highly resilient and provides continuous uptime, manageability and operational efficiency. Each Summit X450a switch offers the same high-performance, non-blocking hardware technology used on Extreme Networks BlackDiamond® 8800 series, in the Extreme Networks tradition of simplifying network deployments through the use of common hardware and software throughout the network.

The flexible and scalable Summit X450a switch is an ideal aggregation switch for traditional small core enterprise networks. The Summit X450a series is a perfect first level aggregation device for DSUs/MTS at a local central office before traffic is passed on to the Extreme Networks BlackDiamond 8810 core switch with 8800-vd series modules at the Point of Presence (POP), where traffic is managed and connected to service networks.

The versatile Summit X450a switch provides high-density gigabit plus optional 10 Gigabit Ethernet ports in a compact 1RU format, supporting a full range of Layer 2 to Layer 4 functionalities on every port to allow high productivity. Optional redundant power supplies are available for each switch to protect against power anomalies, providing a continuous operational network.
