

Fuel selection

Fuel selection

3

Your vehicle is designed to use unleaded gasoline only. It is equipped with a fuel filter tube especially designed to accept only a small diameter unleaded gasoline dispensing nozzle.

WARNING

- Gasoline is highly flammable and explosive. You could be burned, seriously injured or killed when handling it. Whenever you refuel your vehicle, stop the engine and keep flames, sparks, and smoking materials away from the vehicle. Always handle fuel in well-ventilated outdoor areas.

CAUTION

- Using leaded gasoline in your vehicle will damage the engine, catalytic converter, and the oxygen sensors. Also, using leaded gasoline is illegal, and will void your warranty coverage of the engine, catalytic converter, and oxygen sensors.

Gasoline detergent additives

In the United States, fuel suppliers are required by law to add detergents to their gas-

oline to minimize fuel-injector fouling and minimize intake-valve deposits. Detergent gasoline helps keep your engine in tune and your emission-control system working properly.

Octane requirement

Except for RALLIART

Your vehicle is designed to operate on unleaded gasoline having a minimum octane number of 87 [(MON+RON)/2], or 91 RON.

RALLIART

Your vehicle is designed to operate on premium grade unleaded gasoline having a minimum octane number of 93 [(MON+RON)/2] or higher for optimum performance. In case premium grade unleaded gasoline 93 [(MON+RON)/2] is not available, unleaded gasoline number of 91 [(MON+RON)/2] can be used. However, the performance level is reduced.

In order to maintain exhaust system durability, premium unleaded gasoline having an octane number of at least 91 [(MON+RON)/2] must be used.

If the premium grade unleaded gasoline number of 93 [(MON+RON)/2] or higher is not available on journey, etc., regular unleaded gasoline having an octane number of 87 [(MON+RON)/2] can be used temporarily as an emergency measure.

MON: Motor Octane Number

RON: Research Octane Number

Oxygenated gasoline

Gasoline sold at some service stations contains oxygenates such as ethanol, although the oxygenates may not be identified by those names. Oxygenates are required in some areas of the country. Such fuel can be used in your vehicle.

Ethanol (Gasohol)

A mixture of up to 10 % ethanol (grain alcohol) and 90 % unleaded gasoline may be used in your vehicle, provided the octane number is at least as high as that recommended for unleaded gasoline.
