

Types of Landforms

What is a landform?

Landforms are naturally formed features that are in place on Earth's surface. Many of them are created by natural forces such as the sea or wind.

Landforms often occur where we live, but some are far from where we live.

There are many different types of landforms, but they are all part of the same family.

What is not a landform?

Not a tree – what do you think a landform is?

Not a person or animal – what do you think a landform is?
