Language Of Science Volume 5 M A K Halliday:

Language of Science M.A.K. Halliday, 2006-06-19 Halliday's investigations into grammatical metaphor take us deeply into the way we construct and expand meanings starting with representations of concrete experienced events and ending with theoretical worlds populated by abstract entities linked through generalized relations and causalities. He finds these processes most strikingly in the development of the modern sciences that have historically created robust virtual worlds of theory from observable material events. He sees the same processes of grammatical metaphor as children learn to participate in our built symbolic environment particularly as they are introduced to these meaning systems in schools, an institution designed expressly for that purpose. Professor Charles Bazerman, University of California Santa Barbara. Analysing Scientific Discourse from A Systemic Functional Linguistic Perspective Jing Hao, 2020-01-21 This book describes the discourse of biology from a systemic functional linguistic perspective. It offers a detailed description of resources based on text analysis. The description reveals co-textual patterns of language features, their expressions through grammatical resources as well as their functions in the disciplinary context. The book also applies the description to analyse student texts in undergraduate biology, revealing characteristics of language and knowledge development. Although the discussion in this book focuses on the discourse of biology, both the language description and the descriptive principle can be used to inform the examination of knowledge in academic discourse in general, making this key reading for students and researchers in systemic functional linguistics, discourse analysis, English for academic purposes, applied linguistics, and science education.

Theorizing and Applying Systemic Functional Linguistics Bo Wang, Yuanyi Ma, 2023-12-29 This collection reflects on developments in the field of Systemic Functional Linguistics (SFL) as embodied in the work of Christian M. I. M. Matthiessen, highlighting his diverse contributions to the field from theoretical and applied perspectives. The book surveys Matthiessen's academic career and illustrates the myriad ways in which his work has reverberated through to current innovations in SFL research. The book also exhibits his theoretical contributions to major linguistic topics and his influence on the development of SFL. Written by some of the world's foremost scholars in the field, chapters cover such topics as theories of SFL and its applications in different domains as well as the developmental trajectories of SFL in major geographic areas. Addressing the key issues in SFL through the lens of Matthiessen's career, this book is an accessible resource for students and scholars in systemic functional linguistics as well as those interested in the systemic functional approach in related areas within linguistics. War and Its Ideologies Annabelle Lukin, 2018-10-09 Ideology is so powerful it makes us believe that war is rational despite both its brutal means and its devastating ends. The power of ideology comes from its intimate relation to language; ideology recruits all semiotic modalities but language is its engine room. Drawing on Halliday's linguistic theory, in particular his account of the semiotic big bang, this book explains the latent semiotic machinery of language on which ideology depends. The book illustrates the ideological power of language through a study of perhaps the most significant and

consequential of our ideologies those that enable us to legitimate celebrate even venerate war at the same time that we abhor denounce and proscribe violence To do so it makes use of large multi register corpora including the British National Corpus and the reporting of the 2003 invasion of Iraq by Australian US European and Asian news sources Combining detailed text analysis with corpus linguistic methods it provides an empirical analysis showing the astonishing reach of our ideologies of war and their profoundly covert and coercive power Key Themes and New Directions in Systemic Functional

Translation Studies Bo Wang,Yuanyi Ma,2022-04-19 This collection features eight interviews with seven senior scholars whose seminal works involve the application of Systemic Functional Linguistics SFL to translation studies have advanced Systemic Functional Translation Studies SFTS as a research agenda in its own right with critical reflections and insights into future directions The book introduces SFTS as a research field tracing its development and situating the contributions of the scholars interviewed within this tradition An international group of researchers working across a diverse range of topics within SFTS are interviewed including Christian M I M Matthiessen Erich Steiner J R Martin Juliane House Jeremy Munday Adriana Pagano and Akila Sellami Baklouti Taken together the collection offers a comprehensive account of theoretical and methodological developments in SFTS with critical overviews of these scholars body of work within the research area and reflections on the emerging research that pushes SFTS scholarship into new frontiers This volume will be of particular interest to scholars in translation studies and Systemic Functional Linguistics as well as those interested in innovations in linguistic theory **Systemic Functional Insights on Language and Linguistics** Christian M.I.M.
