Find the molarity of the following solutions:

$$\frac{\text{mol solute}}{\text{L solution}}$$

- 1) 0.5 moles of sodium chloride is dissolved to make 0.05 liters of solution.

$$\frac{0.5 \text{ mol NaCl}}{0.05 \text{ L}} = 10 \text{ M} = 10 \frac{\text{mol}}{\text{L}}$$

- 2) 0.5 grams of sodium chloride is dissolved to make 0.05 liters of solution.

$$\frac{0.5 \text{ g NaCl}}{0.05 \text{ L}} \times \frac{1 \text{ mol NaCl}}{58.44 \text{ g NaCl}} = 0.17 \text{ M}$$

- 3) 0.5 grams of sodium chloride is dissolved to make 0.05 mL of solution.

$$\frac{0.5 \text{ g}}{58.44 \text{ g}} \times \frac{1 \text{ mol}}{1} = 0.0085 \text{ mol}$$

$$\frac{0.0085 \text{ mol}}{0.00005} = 170 \text{ M}$$

$$0.05 \text{ mL} \times \frac{1 \text{ L}}{10^3 \text{ mL}}$$

**Chemical Principles in Practice** Jerry A. Bell, 1967. This forward-looking laboratory text includes thirty-three experiments designed to serve high-level introductory chemistry courses. It is intended in part to give the students practice in techniques not only those generally considered the techniques of chemistry but also those of mathematics. However, the only prerequisite is a good background in high school mathematics. Ideally suited for use with University Chemistry or College Chemistry by Bruce Mahan, this book follows the physical chemistry approach of these and most other modern chemistry texts, maintaining the same flavor, emphasis, and degree of sophistication. All experiments are open-ended and include suggestions for following them up. There is considerable emphasis on the involvement of the student in planning his own procedures and quantitative thinking.

Weber, 2001 A rigorous and in depth approach to environmental systems and processes Concern over environmental changes resulting from oversubscription and exploitation of Earth's resources is mounting Acid rains from power generation and industrial process emissions to the atmosphere contamination of water resources by spills and discharges of hazardous chemicals the greenhouse and global warming effects of carbon dioxide generated by consumption of organic fuels and the depletion of ecosystem stabilizers such as oxygen in lakes and streams overfertilized by human wastes these are a few of the considerations facing environmental engineers and scientists today These are complex and confounding processes and phenomena and their effects vary widely among the virtually limitless number of environmental systems and subsystems on Earth Environmental Systems and Processes Principles Modeling and Design is the first book to explain that although environmental systems are virtually limitless in number change is controlled by a relatively small set of fundamental processes Written by one of the initiators and foremost proponents of the first principles approach to environmental system characterization and problem solving this informative volume details how three fundamental issues lie at the base of every environmental process i.e. the amount and form of available energy the rate at which that energy can be exercised and the configuration and dynamics of the system in which the process occurs The author demonstrates how the mastering of relatively few fundamental principles can provide the reader with the tools necessary to solve a broad range of environmental problems Topics discussed in Environmental

Systems and Processes Principles Modeling and Design include fluid flow and mass transport passive and reactive interphase mass transfer elementary and complex process rates ideal hybrid and nonideal system modeling and design and multiphase and interfacial process dynamics and design The unique and highly effective format of presenting several simple but essential fundamentals first followed by detailed illustrative examples and explanations of how these principles describe various complex specific environmental systems and processes makes Environmental Systems and Processes Principles Modeling and Design a requisite for environmental sciences and engineering classrooms and a staple for the bookshelves of all environmental professionals
