Language Use and Language Learning in CLIL Classrooms Christiane Dalton-Puffer, Tarja Nikula, Ute Smit, 2010
This volume explores a highly topical issue in second and foreign language education the spreading practice in mainstream education to teach content subjects through a foreign language CLIL has been enthusiastically embraced as a language enrichment measure in many contexts and finally research can offer principled insights into its dynamics and potentials The editors introductory and concluding chapters offer a synthesis of current CLIL research as well as a critical discussion of unresolved issues relating both to theoretical concerns and research practice The individual contributions by authors from a range of European contexts report on current empirical research in this dynamic field The focus of these chapters ranges from theoretical to empirical from learning outcomes to classroom talk examining both the written and spoken mode across secondary and tertiary educational contexts This volume is a valuable resource not only for researchers and teachers but also for policy makers

Discourse in Content and Language Integrated Learning (CLIL) Classrooms Christiane Dalton-Puffer, 2007 The label CLIL stands for classrooms where a foreign language English is used as a medium of instruction in content subjects This book provides a first in depth analysis of the kind of communicative abilities which are embodied in such CLIL classrooms It examines teacher and student talk at secondary school level from different discourse analytic angles taking into account the interpersonal pragmatics of classroom discourse and how school subjects are talked into being during lessons The analysis shows how CLIL classroom interaction is strongly shaped by its institutional context which in turn conditions the ways in which students experience use and learn the target language The research presented here suggests that CLIL programmes require more explicit language learning goals in order to fully exploit their potential for furthering the learners appropriation of a foreign language as a medium of learning

Content and Language Integrated Learning Yolanda Ruiz de Zarobe, Rosa María Jiménez Catalán, 2009-05-11 This book contributes to the growth of interest in Content and Language Integrated Learning CLIL an approach to second foreign language learning that requires the use of the target language to learn content Within the framework of European strategies to promote multilingualism CLIL has begun to be used extensively in a variety of language learning contexts and at different educational systems and language programmes This book brings together critical analyses on theoretical and implementation issues of Content and Language Integrated Learning and empirical studies on the effectiveness of this type of instruction on learners language competence The basic theoretical assumption behind this book is that through successful use of the language to learn content learners will develop their language proficiency more effectively while they learn the academic content specified in the curricula

Discourse and language learning across L2 instructional settings

, 2012-01-01 Studies on discourse and language learning originated in the field of general education and they focused on first language learning environments However since 1980s research on discourse and language learning broadened the scope of investigation to respond to second and foreign language environments Recently the emergence of new language learning contexts such as computer mediated communication multilingual settings or content and language integrated contexts requires further research that focuses on discourse and language learning From this perspective the present volume aims to

broaden the scope of investigation in foreign language contexts by exploring discourse patterns in the classroom and examining the impact of factors such as gender explicitness of feedback or L1 use on language learning through discourse. With that aim in mind this volume will bring together research that investigates discourse in various instructional settings namely those of primary secondary and university L2 learning environments content and language integrated contexts and other new language learning settings. The number and variety of languages involved both as the first language e.g. English Finnish Basque Spanish Japanese French Italian Catalan as well as the target foreign language e.g. English French Italian Japanese Spanish makes the volume specially attractive. Additionally the different approaches adopted by the researchers participating in this volume such as information processing sociocultural theory or conversation analysis widen the realm of investigation on discourse and language learning. Finally the strength of the volume also lies in the range of educational settings primary secondary and tertiary education and the worldwide representation of contributors across seven different countries namely those of Spain France Austria Finland Germany Canada Australia and the United States. The uniqueness of the volume is due to its eclectic and comprehensive nature in tackling instructional discourse. Worldwide outstanding researchers like Julianne House Carme Muñoz Ute Smit Tarja Nikula or Roy Lyster to quote but a few adopt different perspectives in this joint contribution that will certainly broaden the scope of research on language learners discourse.

Input in English-Medium Instruction Francesca Costa, Cristina Mariotti, 2023-03-07 This edited book investigates the input provided by lecturers in English Medium Instruction (EMI) to reveal the characteristics of both written and oral inputs in EMI settings and their pedagogical implications. The book works on two assumptions firstly that field exposure to input is the prime mover of the teaching learning process and secondly that its quality is fundamental for the development of discipline specific knowledge with particular reference to university settings. The volume is timely as it contains original research addressing both theoretical reflections and practical information on how content lecturers can enhance the effectiveness of their teaching practice through English including a relatively unexplored and increasingly relevant topic represented by the synergy between spoken input and written and multimodal materials. Moreover it provides insight for EAP teachers and EMI training professionals into how lecturer training programmes and activities can be improved by focusing on communicative functions and presentation strategies that can selectively address and improve students mastery of disciplinary discourse.

Board Games in the CLIL Classroom Thomai Alexiou, Athanasios Karasimos, 2023-12-18 The present book explores how modern board gaming and language teaching can be beneficially combined to achieve optimal impact.
