Research in Landscape Architecture Adri van den Brink, Diedrich Bruns, Hilde Tobi, Simon Bell, 2016-11-10 This book looks at research methods that are specific to and for landscape architecture and contributes to the further development of landscape architecture as an academic discipline in its own right Landscapes of Voluntarism Christine Milligan, David Conradson, 2011 The appeal of voluntary action as a solution to growing welfare needs in advanced capitalist countries raises important questions about the social impacts and spatial equity of such provision For the first time these issues are addressed within a single book exploring the complex relationship between voluntary action society and space The Demilitarized Zone (DMZ) of Korea Kwi-Gon Kim, 2013-08-28 Untouched since 1953 the Korean DMZ Demilitarized Zone has transformed itself into one of the few ecologically pristine zones and a vital habitat for endangered species Often cited as a potential peace park it could one day be a common ground for reconciliation and harmony A wealth of data and information has been produced over time documenting significant aspects of the DMZ and its implications for human and ecological security both in Korea and worldwide However there is no single book in English that brings together the findings on the mechanism of evolution the ecology and biodiversity of the DMZ The DMZ of Korea by Kwi Gon Kim is the first step in this direction It seeks to link scientific information and policy making for the future DMZ ecosystem management taking into account the fact that the area has become over the years a natural treasure as a habitat for rare birds and other wildlife and a fertile environment for a thriving plant community It also provides a framework for ensuring the long term sustainability of the DMZ The book holistically describes the current environmental status of the DMZ and identifies bioregions resources habitats and species By outlining the current scientific data and information needed to classify the different wetland types assess the biological integrity understand the threat factors and to suggest conservation and management strategies the book provides a one stop shop scientific and policy source of information which will undoubtedly be of great interest to students researchers practitioners and policy decision makers in the areas of planning natural resource management public management ecology landscape architecture geography and the life sciences Prof Dr Kwi Gon Kim obtained his Ph D at UCL University of London UK He is a professor emeritus at Seoul National University and the Co President of the Korea DMZ Council in Seoul Korea Ecological Planning Forster Ndubisi, 2003-04-30 Chosen by Choice Magazine as an Outstanding Academic Title for 2003 Ecological planning is the process of understanding evaluating and providing options for the use of landscape to ensure a better fit with human habitation In this ambitious analysis Forster Ndubisi provides a succinct historical and comparative account of the various approaches to this process He then reveals how each of these approaches offers different and uniquely useful perspectives for understanding the dialogue between human and environmental processes Ndubisi begins by examining the philosophies behind and major contributors to ecological thinking during the past 150 years as well as the paradigm shift in planning that occurred in recent decades as a result of a growing global ecological

awareness He then turns to landscape suitability analysis and discusses alternative approaches to ecological planning such as applied human ecology applied landscape ecology and others Finally he offers a comparative synthesis of the approaches in order to reveal the theoretical and methodological assumptions inherent when planners choose one approach over the other Ndubisi concludes that no one approach can by itself adequately address the whole spectrum of ecological planning issues For this reason he offers guidance as to when it may be appropriate for landscape architects and planners to emphasize one approach rather than another
