Bobo, 2001-09-30 African Americans have suffered intensely at the hands of America's dominant group but the roles played by urban planning land use policy and the free market are not well known Presenting a new conceptual approach this book considers their locking effect on African Americans showing for instance that one acre zoning and similar policies in upscale neighborhoods lock African Americans out while market mechanisms in decaying neighborhoods lock them in Arguing that the locking effect leads to the disenfranchisement of African Americans Bobo shows how wealth is channeled to the dominant group and African Americans' life choices are denuded creating a volatile situation Although classical economic theory holds that a free market allocates scarce resources in the best interest of society in reality market mechanisms do not work to the advantage of African Americans Nor does public regulation of land use operate in their interest although public policy is presumed to produce equitable and favorable outcomes for all members of society This book explores how a combination of government regulation of land use and free market forces have created the locking effect which has cultivated and sustained a process of disenfranchisement of African Americans **Microeconomics** Campbell R. McConnell, Stanley L. Brue, 1999 Throughout DiscoverEcon you will notice expanded exercises interactive graphs and tutorials You will also notice 25 new videos hosted by Paul Solman Economics Correspondent for The Lehrer NewsHour on PBS Solman developed these videos on DVD specifically for Principles of Economics to further illustrate and reinforce basic economic concepts from the text These videos are linked to DiscoverEcon topics to let you view the videos as you work through each DiscoverEcon chapter

The South African Labour Market F. S. Barker, 1999 This enlightening book contains an abundance of information about the South African labour market It covers several significant developments including a new democratic government globalization increasing rates of unemployment and the introduction of new laws **The Lost Art of Economics** David C. Colander, 2001 Economics is the study of a complex system in which simple laws are not always forthcoming That complexity mandates three branches of the profession positive normative and the art of economics The economics profession has focused on one of these positive economics and in doing so has lost the art of economics In a series of provocative essays the author argues that most of what economists do is applied policy which belongs in the art of economics not in normative or positive economics The essays explore the forces in academic institutions that have led economics to its current position as

well as the implications of the lost art for the economics profession and its future In the end the author is positive about the future of the profession and predicts that in 2050 it will no longer be as Solow suggested it currently is the overeducated in pursuit of the unknowable Instead it will be the appropriately educated in search of the knowable The essays are written in a highly accessible style and can be enjoyed by most non economists as well as by those economists who don t take themselves too seriously It can be usefully read by all economists even those who do take themselves too seriously American Book Publishing Record Cumulative 1998 R R Bowker Publishing,1999-03
