SECTION II - RIGHT HAND SIDE ELEMENTS

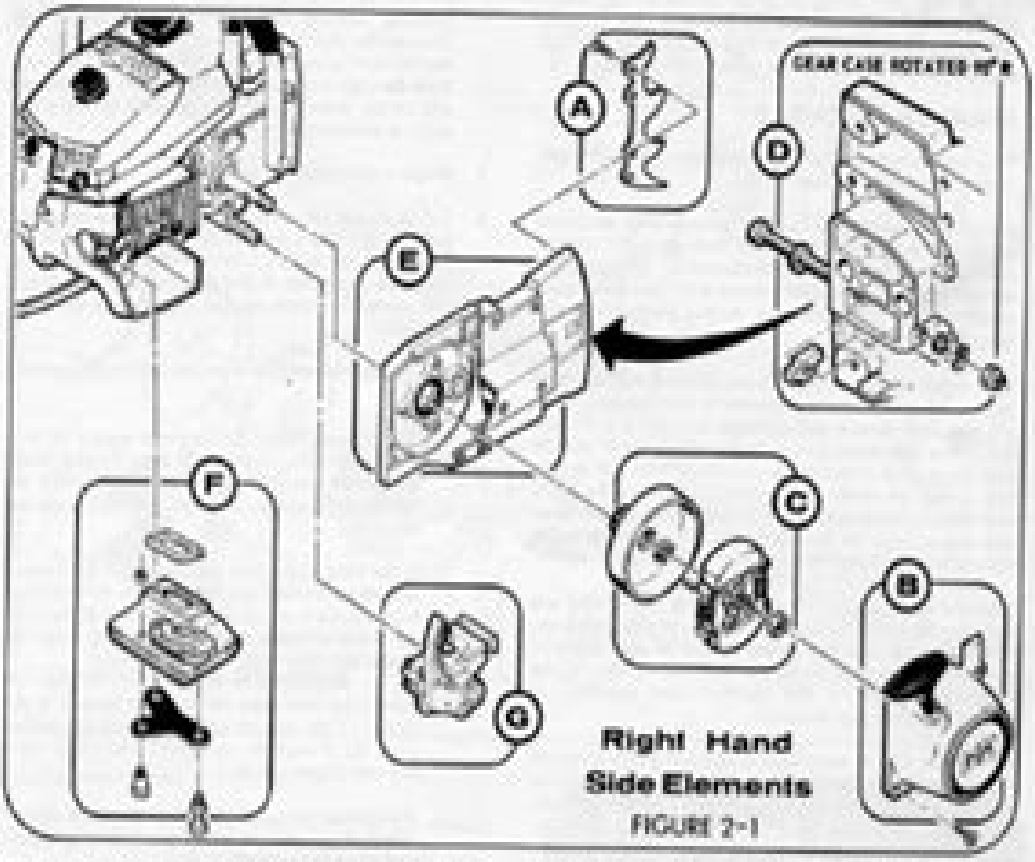

FIGURE 2-1

This section covers servicing of the assemblies on the right hand side of the saw (Figure 2-1): (A) Spike, (B) starter assembly, (C) clutch assembly, with drum and sprocket or drum and gear, (D) chain tension adjustment, (E) automatic oiler and transmission or gear drive saws, (F) spark arrester mufflers and (G) Power Sharp mechanism.

SPIKE

Spikes were supplied with some of the models in this series. Spike kits for saws which did not have spikes, have been available as indicated in the respective illustrated parts lists for the saws. Where necessary, instruction sheets accompany each kit. The instructions should be followed carefully.

If the spike installed on a saw is damaged, a new spike should be installed.

Direct Drive Saws

Early models of some direct drive saws of this series used a clutch guard which was not drilled for installation of a spike. When installing a spike on these undrilled clutch guards, follow the instructions accompanying kits #02341 and #02341A. Should the instruction sheet not be available, the correct method of installation and the necessary parts are shown in Figure 2-2.
