Minority Report Computer Screen:

Typeset in the Future Dave Addey, 2018-12-11 A designer's deep dive into seven science fiction films filled with gloriously esoteric nerdery and observations as witty as they are keen. Wired In Typeset in the Future blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics discovering how they create compelling visions of the future through typography and design. The book delves deep into 2001 A Space Odyssey Star Trek The Motion Picture Alien Blade Runner Total Recall WALL-E and Moon studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills concept art type specimens and ephemera plus original interviews with Mike Okuda Star Trek Paul Verhoeven Total Recall and Ralph Eggleston and Craig Foster Pixar. Typeset in the Future is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.

Screening Big Data Gerald Sim, 2024-07-30 This book examines the influence of key films on public understanding of big data and the algorithmic systems that structure our digitally mediated lives. From star-powered blockbusters to civic-minded documentaries positioned to facilitate weighty debates about artificial intelligence, these texts frame our discourse and mediate our relationship to technology. Above all, they impact society's abilities to regulate AI and navigate big tech's political and economic maneuvers to achieve market dominance and regulatory capture. Foregrounding data politics with close readings of key films like Moneyball Minority Report The Social Dilemma and Coded Bias, Gerald Sim reveals compelling ways in which films and tech industry adjacent media define apprehension of AI. With the mid-2010s techlash in danger of fizzling out, Screening Big Data explores the relationship between this resistance and cultural infrastructure while highlighting the urgent need to refocus attention onto how technocentric media occupy the public imagination. This book will interest students and scholars of film and media studies, digital culture, critical data studies, and technopolitics.

Digital Interfacing Daniel Black, 2018-10-26 This book takes the interface or rather to interface a process rather than a discrete object or location as a concept emblematic of our contemporary embodied relationship with technological artefacts. The fundamental question addressed by this book is: How can we understand what it means to perceive or act upon the world as a body artefact assemblage? Black works to clarify the role of artefacts of all kinds in human perception and action, then considers the ways in which new digital technologies can expand and transform this capacity to change our mode of engagement with our environment. Throughout the discussion is grounded in specific technologies, some already familiar and some still in development, e.g. new virtual reality and brain-machine interface technologies, natural user interfaces, etc. In order to develop a detailed generalizable theory of how we interface with technology, Black assembles an analytical toolkit from a number of different disciplines including media theory, ethology, clinical psychology, cultural theory, philosophy, science, and technology studies, cultural history, aesthetics, and neuroscience.

Beyond Media Borders, Volume 1 Lars Elleström, 2020-10-14 This open access book promotes the idea that all media types are multimodal and that

comparing media types through an intermedial lens necessarily involves analysing these multimodal traits The collection includes a series of interconnected articles that illustrate and clarify how the concepts developed in Elleström's influential article *The Modalities of Media A Model for Understanding Intermedial Relations* Palgrave Macmillan 2010 can be used for methodical investigation and interpretation of media traits and media interrelations The authors work with a wide range of old and new media types that are traditionally investigated through limited media specific concepts The publication is a significant contribution to interdisciplinary research advancing the frontiers of conceptual as well as practical understanding of media interrelations This is the first of two volumes It contains Elleström's revised article and six other contributions focusing especially on media integration how media products and media types are combined and merged in various ways

From Film Adaptation to Post-Celluloid Adaptation Costas Constandinides, 2010-10-21 The main corpus of film adaptation thus far has focused on films based on canonical literature *From Film Adaptation to Post Celluloid Adaptation* takes the next logical step by discussing the emerging modes of film adaptation from older media to new mainly focusing on the computer generated reconstructions of popular narratives and characters along with other forms of convergence such as the Internet While New Media is a broad concept the book will concentrate on the ways digital technology is being used in the encoding of films and discuss the ways this shift can be debated from a theoretical perspective Though the discussion is framed through the new media lens the work will not exclude a broader understanding of New Media which refers to video games official websites and interactivity so as to examine how the visual style of contemporary films is dispersed across and influenced by other media Discussing films like *Minority Report* *King Kong* 300 and *Wanted* in relation to Film Adaptation theory the work aims to challenge and rework the definition of adaptation *The Extended Mind* Annie Murphy Paul, 2021 A bold new book reveals how we can tap the intelligence that exists beyond our brains in our bodies our surroundings and our relationships
