Jisung Park,2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It's hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In Slow Burn R Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality

Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally

Atlas of Material Worlds Matthew Seibert,2021-08-17 *Atlas of Material Worlds* is a highly designed narrative atlas illustrating the agency of nonliving materials with unique ubiquitous and often hidden influence on our daily lives Employing new materialism as a jumping off point it examines the increasingly blurry lines between the organic and inorganic engaging the following questions What roles do nonliving materials play Might a closer examination of those roles reveal an undeniable agency we have long overlooked or disregarded If so does this material agency change our understanding of the social structures ecologies economies cosmologies technologies and landscapes that surround us And perhaps most importantly why does material agency matter This is the story of the world s driest nonpolar desert pink flamingos and cerulean blue lithium ponds industrial shipping logistics pudding like jiggling substrates and monuments of mud galactic bodies radioactive sheep and the yellowcake of uranium Put simply this book dares readers to see the world anew from material up *Atlas of Material Worlds* offers this new relationship to our host environment in a time of mounting crises accelerating climate change ballooning socioeconomic inequality and rising toxic nationalism uniquely telling materialist stories for practitioners and students in landscape architecture and other built environment disciplines **The New York Times Index** ,1980
