Ingold, 2022-02-24 Knowledge comes from thinking with from and through things not just about them We get to know the world around us from the inside of our being in it Drawing on the fields of anthropology art architecture and education this book addresses what knowing from the inside means for practices of teaching and learning If knowledge is not transmitted ready made independently of its application in the world but grows from the crucible of our engagements with people places and materials then how can there be such a thing as a curriculum What forms could it take And what could it mean to place such disciplines as anthropology art and architecture at the heart of the curriculum rather than as at present on the margins In addressing these questions the fifteen distinguished contributors to this volume challenge mainstream thinking about education and the curriculum and suggest experimental ways to overcome the stultifying effects of current pedagogic practice **Brazilian Elites and their Philanthropy** Jessica Sklair, 2021-11-04 This book explores the philanthropy of

Brazilian elites during a key period in recent Brazilian history from Workers Party president Lula s last term in office through to the election of far right president Jair Bolsonaro Against this backdrop of political upheaval the book asks what

philanthropy can reveal about the role of corporate and wealth elites in upholding the structures of socioeconomic inequality that continue to define Brazilian society The book argues that around the world the private sector's growing engagement in international development has led to the emergence of a global philanthropic project centred on practices of philanthrocapitalism and social finance which ultimately seeks to legitimise global capitalism and the elite interests it serves Drawing on an in depth and wide ranging ethnographic study among philanthropists and their advisors in over 30 Brazilian foundations and intermediary organisations the book combines a structural critique of the capitalist ideologies underlying philanthropic practice with a robust exploration into the ways in which wealthy Brazilians appropriate philanthropy directly to legitimise elite reproduction and the accumulation of wealth Researchers across Latin American studies development studies and the anthropology of development will find this book a timely contribution to the under researched areas of elite studies and the study of philanthropy

**The Devil's Fruit** Dvera I. Saxton, 2021-02-12 *The Devil's Fruit* describes the facets of the strawberry industry as a harm industry and explores author Dvera Saxton's activist ethnographic work with farmworkers in response to health and environmental injustices She argues that dealing with devilish as in deadly depressing disabling and toxic problems requires intersecting ecosocial emotional ethnographic and activist labors Through her work as an activist medical anthropologist she found the caring labors of engaged ethnography take on many forms that go in many different directions Through chapters that

examine farmworkers embodiment of toxic pesticides and social and workplace relationships Saxton critically and reflexively describes and analyzes the ways that engaged and activist ethnographic methods frameworks and ethics aligned and conflicted and in various ways helped support still ongoing struggles for farmworker health and environmental justice in California These are problems shared by other agricultural communities in the U S and throughout the world
