Online Laboratories in Engineering and Technology Education Dominik May, Michael E. Auer, Alexander Kist, 2025-01-29

This comprehensive book divided into seven sections showcases groundbreaking research findings that blend new experiences from the COVID 19 pandemic with long term research on online laboratories and virtual experimentation. Providing an adequate learning experience in the laboratory has long been a major challenge in science engineering and technology education. Recent years have further revealed the complexities of offering distance or remotely accessible educational settings particularly for laboratory based courses. In response many academic institutions have innovated by transitioning their laboratory classes into online laboratories or providing laboratory kits for at home use. This unprecedented situation has sparked numerous new developments approaches and activities revolutionizing the field. With contributions from leading researchers and practitioners across diverse disciplines this book delves into current trends addresses critical challenges and uncovers future opportunities for laboratory based education in the context of online learning. Whether readers are educators seeking innovative teaching strategies researchers exploring the latest advancements or academic leaders looking to enhance remote learning experiences this book provides valuable insights and practical solutions. It explores how online laboratories are transforming education and discovers the potential they hold for the future.

Advances in Human Factors in Robots and Unmanned Systems Jessie Chen, 2019-06-10. This book focuses on the importance of human factors in the development of safe and reliable unmanned systems. It discusses current challenges such as how to improve the perceptual and cognitive abilities of robots, develop suitable synthetic vision systems, cope with degraded reliability in unmanned systems, predict robotic behavior in case of a loss of communication, the vision for future soldier robot teams, human agent teaming, real world implications for human robot interaction and approaches to standardize both the display and control of technologies across unmanned systems. Based on the AHFE 2019 International Conference on Human Factors in Robots and Unmanned Systems held on July 24-28, 2019, Washington D C USA, this book fosters new discussions and stimulates new advances in the development of more reliable, safer and highly functional devices for carrying out automated and concurrent tasks.

Towards Unmanned Apple Orchard Production Cycle Zhao Zhang, Xufeng Wang, 2023-12-11. The book provides the most recent technology for sensing and automation in apple production cycle in terms of bagging, robotics, flower pollination, robotics, pruning, robotics and harvest robotics. It does not only summarize the development of technology progress but also discuss the future trend for unmanned apple production cycle. Though apple production still mainly relies on manual labor, a huge number of innovative technologies emerge during the past years which pave the road for unmanned apple orchard management. A book summarizing all these new and innovative technologies is needed to provide an easy approach to understand this field quickly and comprehensively, which drives the publication of this book. This book is a useful reference for students, researchers and practitioners in the field of apple production.
