Keane,2016-11-07 In Cultural and Theological Reflections on the Japanese Quest for Divinity John J Keane offers an explanation of Japanese divinity kami using sociology anthropology linguistics literature and history He presents an overview of how the Japanese have sought to love and serve their kami a quest that rivals the interest that the West gives to God The principles of interreligious dialogue are applied to the meaning of kami and a plea is made for a dialogue that respectfully accepts differences between the cultures and the theologies of Eastern and Western thought Important cultural themes are discussed as a part of this quest such as the emperors of Japan and the Japanese Tea Ceremony The work also challenges the understanding of kami as highlighted by Akutagawa Ryunosuke and Endo Shusaku      Icons and Iconoclasm in Japanese Buddhism Pamela D. Winfield,2013-02-20 Winner of the Association of Asian Studies s Southeast Conference Book Prize 2014

Does imagery help or hinder the enlightenment experience Does awakening involve the imagination or not Can art ever fully represent the realization of buddahood In this study Pamela D Winfield offers a fascinating comparison of two pre modern Japanese Buddhist masters and their views on the role of imagery in the enlightenment experience Kukai 774 835 believed that real and imagined forms were indispensable to his new esoteric Mikkyo method for becoming a Buddha in this very body sokushin jobutsu yet he also deconstructed the significance of such imagery in his poetic and doctrinal works Conversely Dogen 1200 1253 believed that just sitting in Zen meditation without any visual props or mental elaborations could lead one to realize that this very mind is Buddha sokushin zebutsu but he also privileged select Zen icons as worthy of veneration In considering the nuanced views of both Kukai and Dogen anew Winfield updates previous comparisons of their oeuvres and engages their texts and images together for the first time In so doing she liberates them from past sectarian scholarship that has pigeon holed them into iconographic ritual vs philological philosophical categories She also restores the historical symbiosis between religious thought and artistic expression that was lost in the nineteenth century disciplinary distinction between religious studies and art history Finally Winfield breaks new methodological ground by proposing space and time as organizing principles for analyzing both meditative experience and visual material culture As a result this study presents a wider and deeper vision of how Japanese Buddhists themselves understood the role of imagery before during and after awakening
