The African Food Environments Amos Laar,Kaleab Baye,Anna Lartey,Francis Zotor,Gershim Asiki,2023-09-05 In many respects the continent of Africa is in transition Prominent among them currently is the nutrition transition One consequence of the nutrition transition is the increase in prevalence of nutrition related non communicable diseases NCDs such as obesity type 2 diabetes cardiovascular diseases and certain cancers Although NCDs are a global public health problem the rate of increase in NCDs morbidity and mortality in some African countries is staggering This surge has been linked to modifiable environmental factors factors that facilitate the consumption of obesogenic energy dense nutrient poor foods rather than unrefined cereals fruits and

vegetables It has long been recognized that the physical and social environments in which people live work and eat are critical determinants of their health More recently there has been a greater focus on the food environment as a key determinant of health Available evidence shows that unhealthy food environments drive unhealthy diets and unhealthy diet is one of four main risk factors for NCDs **Kaapse bibliotekaris** ,2015 Issues for Nov 1957 include section Accessions
