Linde Hydraulic Control (LHC)

Digital electro-hydraulic controller

Instead of a control unit, an integrated module has taken the place of the control unit. Instead of a hydraulic controller, a computer electronic controller is used with a very powerful microcontroller system. It controls functions for the drive unit and the working hydraulics (2).

Adaptation to various trucks

The electronic control unit is capable of controlling trucks from a variety of series and with different drive systems. To use different truck parameters and sensors, each truck model has a coding that uniquely identifies the truck.

Troubleshooting

The processor of the electronic control unit analyzes analogue and digital signals. The processor recognizes digital messages and system errors, and displays an error message on the display/monitor on the seat interface. In addition, the control unit activates a variety of functions according to the error's highest priority.

- Working light flashes
- Activation/extension of the manual emergency stop
- The truck brakes with automatic brake release and off the target mode
- The manual brake (as the emergency function) the manual emergency stop activates off
- An error code appears on display

These functions can be activated by switching off the emergency stop and the stop switch. During a fault, the control unit shows whether the error is still present. If the error is no longer present, the truck returns normal operation. If the error persists, the error code appears on the display and one of the measures listed above is carried out.

Changing the controller

4.1 Interface

Problems regarding component damage due to electrostatic discharge (ESD) damage to sensitive elements will occur if the controller is moved.

The controller is equipped with a "Threat plug" which is attached to the back to avoid static damage. Connections must never be left open. The system unit monitor and the software version of the controller can be read out via the back connector.

If the controller is replaced, the personnel wear anti-static shoes and anti-static clothing. All necessary information is available on the code Europe.
