Knowledge The Philosophical Quest In History:

Knowledge Steve Fuller, 2015 The theory of knowledge or epistemology is often regarded as a dry topic that bears little relation to actual knowledge practices Knowledge The Philosophical Quest in History addresses this perception by showing the roots developments and prospects of modern epistemology from its beginnings in the nineteenth century to the present day Beginning with an introduction to the central questions and problems in theory of knowledge Steve Fuller goes on to demonstrate that contemporary epistemology is enriched by its interdisciplinarity analysing keys areas including Epistemology as Cognitive Economics Epistemology as Divine Psychology Epistemology as Philosophy of Science Epistemology as Sociology of Science Epistemology and Postmodernism A wide ranging and historically informed assessment of the ways in which man has and continues to pursue question contest expand and shape knowledge this book is essential reading anyone in the Humanities and Social Sciences interested in the history and practical application of epistemology

Knowledge Socialism Michael A. Peters, Tina Besley, Petar Jandrić, Xudong Zhu, 2020-10-07 This is the first collection focusing on knowledge socialism a particularly apt term used to describe a Chinese socialist mode of production and socialist approach to development and modernity based around the rise of peer production new forms of collaboration and collective intelligence Making the case for knowledge socialism the book is intended for students teacher scholars and policy theorists in the field of knowledge economy

The Routledge Companion to Philosophy of Social Science Lee McIntyre, Alex Rosenberg, 2016-12-08 37 Why Is There No Philosophy of Political Science *To Judge and To Justify* Steve Fuller, 2024-10-28 This book argues that judging and justifying are the two skills that specifically require academic training In the current times where the value of a university degree is increasingly questioned it s important to emphasize the significance of these skills This volume addresses that universities are not necessarily stressing these skills preferring instead to focus on the delivery of content and the provision of credentials Its main focus is on articulating the positive case for the university s focus on judging and explaining as its core transferable skills It involves examining the historical and philosophical case for this claim canvassing arguments made and the example set by Plato Francis Bacon Immanuel Kant William Whewell Ludwig Wittgenstein Paul Feyerabend Richard Rorty John Rawls and Robert Nozick as well as considering how they might be realized in today s world This book extends the arguments in Fuller s recent book Back to the University s Future The Second Coming of Humboldt Springer 2023

Post-Truth Steve Fuller, 2018-05-25 Post truth was Oxford Dictionaries 2016 word of the year While the term was coined by its disparagers in the light of the Brexit and US presidential campaigns the roots of post truth lie deep in the history of Western social and political theory Post Truth reaches back to Plato ranging across theology and philosophy to focus on the Machiavellian tradition in classical sociology as exemplified by Vilfredo Pareto who offered the original modern account of post truth in terms of the circulation of elites The defining feature of post truth is a strong distinction between appearance and reality which is never quite resolved and so the strongest

appearance ends up passing for reality The only question is whether more is gained by rapid changes in appearance or by stabilizing one such appearance Post Truth plays out what this means for both politics and science *A Cultural History of the Chinese Character “Ta (她, She)”* Huang Xingtao, 2023-06-26 This book offers a thorough examination of the history of a Chinese female pronoun the Chinese character Ta She and demonstrates how the invention and identification of this new word is inextricably intertwined with matters of sociocultural politics The Chinese character Ta for the third person feminine singular pronoun was introduced in the late 1910s when the voices of women’s liberation rang out in China The invention and dissemination of this word not only reflected an ideological gendering of the Chinese script but also provoked heated academic and popular debate well into the 1930s Thus the history of Ta provides a prism through which to explore modern Chinese history The author provides an ambitious and informed examination of how Ta was invented and promoted in relation to the gender equality movement the politics of neologism and other domestic elements and international catalysts This book is the first major work to survey Ta’s creation It draws on diverse sources including interviews with eight historians who experienced the popularisation of Ta as youths in the 1930s and 40s This book will be an essential read for students and scholars of East Asian Studies Chinese Cultural History and those who are interested in the history of China

Philosophy, Science, and History Lydia Patton, 2014-06-27 Philosophy Science and History A Guide and Reader is a compact overview of the history and philosophy of science that aims to introduce students to the groundwork of the field and to stimulate innovative research The general introduction focuses on scientific theory change assessment discovery and pursuit Part I of the Reader begins with classic texts in the history of logical empiricism including Reichenbach’s discovery justification distinction With careful reference to Kuhn’s analysis of scientific revolutions the section provides key texts analyzing the relationship of HOPOS to the history of science including texts by Santayana Rudwick and Shapin and Schaffer Part II provides texts illuminating central debates in the history of science and its philosophy These include the history of natural philosophy Descartes Newton Leibniz Kant Hume and du Châtelet in a new translation induction and the logic of discovery including the Mill Whewell debate Duhem and Hanson and catastrophism versus uniformitarianism in natural history Playfair on Hutton and Lyell de Buffon Cuvier and Darwin The editor’s introductions to each section provide a broader perspective informed by contemporary research in each area including related topics Each introduction furnishes proposals including thematic bibliographies for innovative research questions and projects in the classroom and in the field

The Routledge Handbook of the History and Sociology of Ideas Stefanos Geroulanos, Gisèle Sapiro, 2023-09-26 The Routledge Handbook of the History and Sociology of Ideas establishes a new and comprehensive way of working in the history and sociology of ideas in order to obviate several longstanding gaps that have prevented a fruitful interdisciplinary and international dialogues Pushing global intellectual history forward it uses methodological innovations in the history of concepts gender history imperial history and history of normativity many of which have emerged out of intellectual history in

recent years and it especially foregrounds the role of field theory for delimiting objects of study but also in studying transnational history and migration of persons and ideas The chapters also explore how intellectual history crosses the study of particular domains law politics economy science life sciences social and human sciences book history literature and emotions

Dialectics as Mode of Thought and Method in History Manolis Dafermos, 2025-11-24 This book provides a thorough and panoramic exploration of dialectics presenting it as both a mode of thought and a method of inquiry deeply embedded in the history of human thought Rather than treating dialectics as a fixed system of abstract principles the book underscores both its dynamic character and its historical development Through careful examination of pivotal moments in dialectics across diverse historical periods and intellectual traditions the book illuminates how dialectics has continually evolved to address the pressing intellectual and social challenges of each era By tracing the historical trajectory of dialectics from its ancient spontaneous forms to its modern expressions the book highlights the significant transformations it has undergone over time The book also addresses the growing crisis in many fields dominated by reductionist and narrowly empirical approaches which have proved inadequate for capturing the complexity and dynamism of developmental processes In response it points to a resurgence of interest in dialectics as a powerful methodological alternative A central claim of the book is that the full potential of dialectics remains largely unrealised Far from being an obsolete relic of the past dialectics emerges as an essential method particularly for the study of complex dynamic systems Ultimately the book reconstructs the historical trajectory of dialectics and advocates its vital role in confronting the epistemological and methodological challenges of contemporary inquiry in an ever changing world

God and the Knowledge of Reality Thomas Molnar, 2021-09-28 Written simply yet comprehensively Molnar's analysis of the history of philosophy and false mysticism leads him to conclude that a return to a moderate realism will save the philosophical enterprise from a series of epistemological and societal absolutes that are embodied in contemporary rationalism and mysticism alike Issues that have been systematically excluded from discourse will have to be reintroduced into the discussion of person and providence Molnar divided the philosophical systems into two groups according to their vision of God and consequently of reality One group removes God from the human scope therefore rendering the world unreal unknowable and meaningless The second group holds that God is immanent in the human soul thereby emphasizing the human attainment of divine status and reducing the extra mental world to a condition of utter imperfection Either way the result is a pseudo mysticism a denial of the creaturely status of human beings What is most needed Molnar claims is a theory of knowledge whose ideal is not fusion but distinction between God and Man subject and object the self and the society By thus raising the question of philosophy over against magic Molnar seeks to awaken the reader from neo dogmatic assumptions and restore speculative thought to its traditional place
