

The new Kodak film disc that helps  
to make disc photography  
as easy as fun

The Kodak disc camera knows when to flash. And it can flash again in just one and a third seconds.

In bright light, it takes pictures even faster. Every half second.

How did Kodak build all this into a camera small enough to fit in the palm of your hand?

With a brand-new invention. The film disc. A disc so thin, there's room in the camera for a whole cluster of electronics. Each disc gives you 15 beautiful, full-size color

pictures. And the lens? All glass. And a fast  $f/2.8$ .

Give the Kodak disc camera this holiday season.

It'll help someone you love capture memories faster and easier than ever before.
